

## Report to Shareholders

## Third Quarter 2020

### National Bank reports its results for the Third Quarter of 2020

The financial information reported in this document is based on the unaudited interim condensed consolidated financial statements for the quarter and the nine-month period ended July 31, 2020 and is prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), unless otherwise indicated. IFRS represent Canadian generally accepted accounting principles (GAAP). All amounts are presented in Canadian dollars.

**MONTREAL, August 26, 2020** – For the third quarter of 2020, National Bank is reporting net income of \$602 million compared to \$608 million in the third quarter of 2019. Third-quarter diluted earnings per share stood at \$1.66 compared to \$1.66 in the third quarter of 2019. Year over year, income before provisions for credit losses and income taxes<sup>(1)</sup> was up in most of the business segments in the third quarter of 2020 but was offset by an increase in provisions for credit losses caused by an economic slowdown resulting from the COVID-19 pandemic.

For the nine months ended July 31, 2020, the Bank's net income totalled \$1,591 million compared to \$1,718 million in the same period of 2019, and its nine-month diluted earnings per share stood at \$4.34 compared to \$4.67 for the nine-month period ended July 31, 2019. This decrease in net income stems from a considerable increase in provisions for credit losses recorded to reflect a significant deterioration in the macroeconomic conditions caused by COVID-19 and the expected impacts on our clients.

"Since the gradual reopening of the economy, many indicators have improved, but the situation remains uncertain, especially given the potential for a second wave of the COVID-19 pandemic. In this environment, the Bank is continuing to deploy efforts to support its employees, its clients, and the community," said Louis Vachon, President and Chief Executive Officer of National Bank of Canada. "While it's still too early to predict how the COVID-19 pandemic will affect the economy in the long term, the Bank is in a strong position with a solid balance sheet, defensive positioning, quality credit portfolios, and a prudent approach to provisioning."

"For the third quarter of 2020, the Bank's net income remained stable year over year, with good performance across most of the business segments being offset by an increase in provisions for credit losses. Furthermore, we maintained high capital and liquidity levels, including a CET1 ratio of 11.4% and a liquidity coverage ratio of 161%," added Mr. Vachon.

### Highlights

(millions of Canadian dollars)	Quarter ended July 31			Nine months ended July 31		
	2020	2019	% Change	2020	2019	% Change
Net income	602	608	(1)	1,591	1,718	(7)
Diluted earnings per share ( <i>dollars</i> )	\$ 1.66	\$ 1.66	-	\$ 4.34	\$ 4.67	(7)
Return on common shareholders' equity	17.0 %	18.7 %		15.3 %	17.9 %	
Dividend payout ratio	46.4 %	41.7 %		46.4 %	41.7 %	
				As at July 31, 2020	As at October 31, 2019	
CET1 capital ratio under Basel III				11.4 %	11.7 %	
Leverage ratio under Basel III				4.3 %	4.0 %	

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

## Personal and Commercial

- Net income totalled \$233 million in the third quarter of 2020 compared to \$274 million in the third quarter of 2019, a decrease essentially due to a decrease in total revenues and an increase in provisions for credit losses.
- Income before provisions for credit losses and income taxes<sup>(1)</sup> totalled \$395 million in the third quarter of 2020, down 8% from \$430 million in the third quarter of 2019 as a result of a smaller net interest margin and a decrease in non-interest income, in particular credit card revenues.
- At \$852 million, the 2020 third-quarter total revenues were down \$39 million or 4% year over year.
- Compared to a year ago, personal lending grew 4% and commercial lending grew 3%.
- Net interest margin stood at 2.15% in the third quarter of 2020 versus 2.23% in the third quarter of 2019.
- Third-quarter non-interest expenses stood at \$457 million, down 1% from the third quarter of 2019.
- At 53.6%, the third-quarter efficiency ratio compares to 51.7% in the third quarter of 2019.

## Wealth Management

- Net income totalled \$128 million in the third quarter of 2020, a 2% increase from \$125 million in the third quarter of 2019.
- Third-quarter total revenues amounted to \$450 million compared to \$437 million in third quarter 2019, a \$13 million or 3% increase driven mainly by growth in transaction-based and other revenues as well as in fee-based revenues.
- Third-quarter non-interest expenses stood at \$274 million, up 2% from \$268 million in the third quarter of 2019.
- At 60.9%, the efficiency ratio improved from 61.3% in the third quarter of 2019.

## Financial Markets

- Net income totalled \$188 million in the third quarter of 2020, a 5% increase from \$179 million in the third quarter of 2019.
- Income before provisions for credit losses and income taxes on a taxable equivalent basis<sup>(1)</sup> totalled \$297 million in the third quarter of 2020, up 17% from \$254 million in the third quarter of 2019.
- Total revenues on a taxable equivalent basis<sup>(1)</sup> amounted to \$503 million, a \$62 million or 14% year-over-year increase.
- Third-quarter non-interest expenses stood at \$206 million compared to \$187 million in the third quarter of 2019.
- The segment recorded \$41 million in provisions for credit losses in the third quarter of 2020 versus \$10 million in the third quarter of 2019, mainly due to provisions recorded on impaired loans.
- At 41.0%, the third-quarter efficiency ratio on a taxable equivalent basis<sup>(1)</sup> improved from 42.4% in the third quarter of 2019.

## U.S. Specialty Finance and International

- Net income totalled \$87 million in the third quarter of 2020, a 26% increase from \$69 million in the same quarter of 2019.
- Third-quarter total revenues amounted to \$210 million, a 21% year-over-year increase driven by revenue growth at the Credigy subsidiary and ABA Bank subsidiary.
- Third-quarter non-interest expenses stood at \$79 million, a \$10 million year-over-year increase attributable to the expansion of ABA Bank's banking network.

## Other

- The *Other* heading of segment results posted a net loss of \$34 million in the third quarter of 2020 compared to a net loss of \$39 million in the third quarter of 2019. This change came mainly from a higher contribution from Treasury activities during the third quarter of 2020.

## Capital Management

- As at July 31, 2020, the Common Equity Tier 1 (CET1) capital ratio under Basel III was 11.4% compared to 11.7% as at October 31, 2019.
- As at July 31, 2020, the Basel III leverage ratio was 4.3%, an increase from 4.0% as at October 31, 2019.

# Management's Discussion and Analysis

August 25, 2020

The following Management's Discussion and Analysis (MD&A) presents the financial condition and operating results of National Bank of Canada (the Bank). This analysis was prepared in accordance with the requirements set out in *National Instrument 51-102, Continuous Disclosure Obligations*, released by the Canadian Securities Administrators (CSA). It is based on the unaudited interim condensed consolidated financial statements (the consolidated financial statements) for the quarter and nine-month period ended July 31, 2020 and prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), unless otherwise indicated. IFRS represent Canadian generally accepted accounting principles (GAAP). This MD&A should be read in conjunction with the consolidated financial statements and accompanying notes for the quarter and nine-month period ended July 31, 2020 and with the *2019 Annual Report*. All amounts are presented in Canadian dollars. Additional information about the Bank, including the *Annual Information Form*, can be obtained from the Bank's website at [nbc.ca](http://nbc.ca) and SEDAR's website at [sedar.com](http://sedar.com).

## Caution Regarding Forward-Looking Statements

From time to time, the Bank makes written and oral forward-looking statements such as those contained in this document, in other filings with Canadian securities regulators, and in other communications. All such statements are made in accordance with applicable securities legislation in Canada and the United States. Forward-looking statements in this document may include, but are not limited to, statements with respect to the economy—particularly the Canadian and U.S. economies—market changes, the Bank's objectives, outlook and priorities for fiscal year 2020 and beyond, its strategies or future actions for achieving them, expectations for the Bank's financial condition, the regulatory environment in which it operates, the impacts of — and the Bank's response to — the COVID-19 pandemic, and certain risks it faces. These forward-looking statements are typically identified by future or conditional verbs or words such as “outlook”, “believe”, “foresee”, “forecast”, “anticipate”, “estimate”, “project”, “expect”, “intend”, “plan”, and similar terms and expressions.

Such forward-looking statements are made for the purpose of assisting the holders of the Bank's securities in understanding the Bank's financial position and results of operations as at and for the periods ended on the dates presented, as well as the Bank's financial performance objectives, vision and strategic goals, and may not be appropriate for other purposes.

By their very nature, these forward-looking statements require assumptions to be made and involve inherent risks and uncertainties, both general and specific. Assumptions about the performance of the Canadian and U.S. economies in 2020, including in the context of the COVID-19 pandemic, and how that will affect the Bank's business are among the main factors considered in setting the Bank's strategic priorities and objectives, including provisions for credit losses. In determining its expectations for economic conditions, both broadly and in the financial services sector in particular, the Bank primarily considers historical economic data provided by the governments of Canada, the United States and certain other countries in which the Bank conducts business, as well as their agencies.

There is a strong possibility that the Bank's express or implied predictions, forecasts, projections, expectations or conclusions will not prove to be accurate, that its assumptions may not be correct and that its financial performance objectives, vision and strategic goals will not be achieved. The Bank recommends that readers not place undue reliance on forward-looking statements, as a number of factors, many of which are beyond the Bank's control, including the impacts of the COVID-19 pandemic, could cause actual results to differ significantly from the expectations, estimates or intentions expressed in these statements. These factors include credit risk, market risk, liquidity and funding risk, operational risk, regulatory compliance risk, reputation risk, strategic risk and environmental risk, all of which are described in more detail in the Risk Management section beginning on page 58 of the Bank's *2019 Annual Report*, and more specifically, general economic environment and financial market conditions in Canada, the United States and certain other countries in which the Bank conducts business; regulatory changes affecting the Bank's business; geopolitical and sociopolitical uncertainty; important changes in consumer behaviour; the housing and household indebtedness situation and real estate market in Canada; changes in the Bank's customers' and counterparties' performance and creditworthiness; changes in the accounting policies the Bank uses to report its financial condition, including uncertainties associated with assumptions and critical accounting estimates; tax laws in the countries in which the Bank operates, primarily Canada and the United States (including the *U.S. Foreign Account Tax Compliance Act (FATCA)*); changes to capital and liquidity guidelines and to the manner in which they are to be presented and interpreted; changes to the credit ratings assigned to the Bank; potential disruption to key suppliers of goods and services to the Bank; potential disruptions to the Bank's information technology systems, including evolving cyberattack risk as well as identity theft and theft of personal information; and possible impacts of catastrophic events affecting local and global economies, including natural disasters and public health emergencies such as the COVID-19 pandemic.

Statements about the expected impacts of the COVID-19 pandemic on the Bank's business, results of operations, corporate reputation, financial position and liquidity, and on the global economy may be inaccurate and differ, possibly materially, from what is currently expected as they depend on future developments that are highly uncertain and cannot be predicted.

The foregoing list of risk factors is not exhaustive. Additional information about these factors can be found in the Risk Management section of the Bank's *2019 Annual Report* and in the COVID-19 Pandemic section of this Report to Shareholders for the Third Quarter of 2020. Investors and others who rely on the Bank's forward-looking statements should carefully consider the above factors as well as the uncertainties they represent and the risks they entail.

Except as required by law, the Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time, by it or on its behalf.

## COVID-19 Pandemic

COVID-19 emanates from an emerging infectious disease, namely, the coronavirus disease. The coronavirus strain was detected in November 2019 in the city of Wuhan in central China, and then spread throughout the world. In early January 2020, the Chinese government implemented strict lockdown procedures and forced several cities—and then an entire region—to remain under lockdown, closing many public sites and enforcing considerable sanitary measures. On January 13, 2020, a first case was reported outside mainland China, and on January 30, 2020, the World Health Organization (WHO) declared that the outbreak of the new coronavirus constituted an international public health emergency.

On March 11, 2020, the WHO declared that the COVID-19 outbreak constituted a pandemic, requiring important protective measures be taken to prevent overcrowding at intensive care units and also to strengthen preventive hygiene. The global pandemic prompted many countries, including Canada, to implement lockdown and social distancing measures designed to slow the development of new contagion hotbeds. Those measures included the closing of borders in many countries and the cancellation of sporting and cultural events around the world, triggering a sudden and widespread drop in market capitalizations on all major stock exchanges around the world arising from the uncertainty and fears about the global economy.

In May 2020, after several weeks of lockdown, Canadian provinces and territories began loosening some of the restrictions imposed at the start of the COVID-19 pandemic. The restart plans differ from one location to the next, depending on the local situation. Although the provinces and territories have announced how their restart will be deployed, authorities have warned that these plans may have to be postponed or modified if the situation changes. Canada lifted almost all restrictions in July 2020, while other countries were delaying their reopening or were going back into lockdown. A second wave of COVID-19 is still feared.

In Canada, banking services are considered essential services and are therefore being maintained despite the lockdown and social distancing measures. Given the current economic and social conditions, the Bank is committed to supporting its employees, clients, and communities. The Bank has ensured the continuity of all its activities since the beginning of this unprecedented crisis. All of its experts have been mobilized to guide and support clients and answer their questions during this period of uncertainty.

### Risk Factors

The spread of COVID-19 has had disruptive and adverse effects in countries in which the Bank operates and more broadly on the global economy. It has caused increased volatility and declines in financial markets, disruptions to global supply chains, a sharp and sudden rise in unemployment, and an economic slowdown. Governments, monetary authorities, and regulators have taken actions to support the economy and the financial system, including taking fiscal and monetary measures to increase liquidity and support incomes, as well as implementing regulatory flexibility measures in respect of capital and liquidity requirements for financial institutions. If the COVID-19 pandemic is prolonged, the adverse impact on the global economy could deepen, augmenting financial market volatility, corporate insolvency risks, and negative household wealth impacts.

The continuation or worsening of the economic conditions caused by the COVID-19 pandemic could have a significant adverse effect on the business, results of operations, corporate reputation, and financial condition of the Bank. It may also have the effect of heightening many of the top and emerging risks the Bank faces, including credit risk, market risk, liquidity and funding risk, operational risk, regulatory compliance risk, reputation risk, strategic risk and environmental risk, all of which are described in more detail in the Risk Management section in this report and in the Bank's *2019 Annual Report*.

The spread of COVID-19 has put certain top and emerging risks to which the Bank is exposed into perspective, such as:

- Credit, market, and liquidity and funding risks: Sudden rise in unemployment, reduced demand for financial products and services, changes to payment terms leading to reduced margins or unprofitable loans, increased borrower defaults leading to increased credit losses and lower mortgaged property values, and constraints on liquidity and capital.
- Technology and information security risk: Increased use of digital channels, massive teleworking (including for critical operations), increased reliance on certain shared technology infrastructures, and an increase in external threats.
- Third-party risk: Government restrictions and measures affecting service delivery, disruptions to key suppliers of goods and services, fourth-party risk, increased use of cloud computing (high concentration of suppliers), and potential financial difficulties among third parties deemed critical.
- Human capital risk: Business disruption resulting from potential absenteeism in the current context (preventive withdrawals, work-life balance, unpaid leave), increased work environment stress for employees who are in contact with clients (fear of being infected or infecting loved ones), challenges related to working from home (isolation and lack of interaction with peers), complexities of integrating and training new resources in the context of a pandemic, issues relating to health and safety at work (spread of the virus in the workplace, ergonomic risks linked to working from home).

- Execution risk and cybersecurity risk: Vulnerability related to errors, operational flexibility (government moratoriums and programs, indexing in the systems of these new programs, processes, controls and accountability to be defined and implemented) and processing capacity (accumulation and processing of delays, increase in client calls, increased use of digital solutions, and increase in transactions).
- Strategic risk (client focus): Increased use of remote services, managing government programs that address financial difficulties faced by clients, temporary closure of several branches, changes in behaviours resulting from COVID-19, and increased risk of fraud.

The extent to which the COVID-19 pandemic negatively affects the Bank's business, results of operations, corporate reputation and financial condition, including its regulatory capital and liquidity ratios and ability to meet regulatory and other requirements as well as the global economy and financial markets will depend on future developments that are highly uncertain and cannot be predicted. These future developments include the scope, severity and duration of the pandemic, actions and measures taken by governmental, monetary, and regulatory authorities and other third parties in response to the pandemic, and the impact and effectiveness of those actions and measures.

The Bank's processes are designed to detect and assess these risks as early as possible so that appropriate mitigating strategies can be applied. Decision-making is supported by risk assessments and management processes that are consistent with the Bank's risk appetite and by prudent levels of capital and liquidity. For additional information, see the sections entitled Risk Management in this MD&A and in the *2019 Annual Report*.

During the quarters ended July 31, 2020 and April 30, 2020, the Bank accelerated and increased the frequency of several activities as part of its risk management framework, including:

- Stress tests and crisis simulations: Identification of vulnerabilities, ability to absorb shocks, and remediation mechanisms.
- Enterprise-wide risk management committee: Regular reporting on credit risk, market risk, liquidity and funding risk, and operational and fraud risk as well as on the evolution of capital.
- Reports and forecasts provided to management and to the Office of the President on a regular basis (daily, bi-weekly and weekly, as applicable).
- Office of the Superintendent of Financial Institutions (Canada) (OSFI): Regular reporting and responses to several ad hoc requests.
- OSFI, Bank of Canada and Finance Minister of Canada: More frequent communications.
- Activation of the corporate crisis unit: Deployed to manage business continuity.
- Internal and external communications: More frequent communications to stakeholders, by the President and Chief Executive Officer, by management – Employee Experience, and by other members of management, depending on the target audience.

To protect its clients and employees, the Bank has implemented measures to prevent the spread of COVID-19. During the second quarter of 2020, when the lockdown measures were most restrictive, the Bank temporarily adjusted the number of open service points and modified the business hours of its branches while ensuring safe access to banking services, with particular attention being paid to banking machines. In addition, since March 13, 2020, the Bank has asked all employees whose tasks allow them to work from home to do so until further notice. Employees who were required to work on site received clear health guidelines, and some have used alternate sites in order to comply with the requested social distancing.

### **The Bank's Financial Performance**

In light of COVID-19 and its impact on global and local economies, Canadian banks are facing a difficult situation. This exceptional situation has led to significant changes in the overall market, such as business closures and temporary layoffs, low interest rates, declining and volatile stock markets, declining oil prices, and government measures implemented in response to COVID-19.

#### Macroeconomic Factors

Assumptions about the performance of the Canadian and U.S. economies in 2020, including in the context of the COVID-19 pandemic and how that will affect the Bank, are among the main factors considered in setting the Bank's strategic priorities and objectives, including provisions for credit losses. In determining its expectations for economic conditions, both broadly and in the financial services sector in particular, the Bank primarily considers historical economic data provided by the governments in Canada, the United States and certain other countries in which the Banks conducts business, as well as their agencies.

The main macroeconomic factors used when estimating allowances for credit losses on loans and other financial assets are as follows: gross domestic product (GDP), the unemployment rate, the housing price index, the rate spread on BBB bonds, the stock market (S&P/TSX), and the West Texas Intermediate (WTI) oil price. For each scenario, namely, the base scenario, upside scenario, and downside scenario, the average of the values over the next 12 months and the average of the values over the remaining forecast period for each macroeconomic factor are used to estimate the expected credit losses for the personal credit portfolio and for the business and government credit portfolio.

During the quarter ended April 30, 2020, the main macroeconomic factors deteriorated considerably given the shutdown of non-essential services. During the quarter ended July 31, 2020, as the lockdown gradually lifted, certain macroeconomic factors rebounded while others continued to decline. Given this environment, the economic variables are fluctuating significantly from one quarter to the next. The data presented for the next 12 months may be misleading with respect to the health of the economy. For example, the 12.9% GDP growth rate anticipated in the base scenario during the next year follows an unprecedented 14.5% decline in activity in the first half of 2020. Despite this return to growth, the unemployment rate remains high for the next year (9.2%), reflective of an economy that continues to idle.

According to the base scenario, the Canadian economy will rebound in the second half of the year as lockdown measures are lifted, but the unemployment rate will remain high at the end of 2020, i.e., above pre-recession levels. Oil will rebound slightly at year's end and rise by the end of 2021. Given a difficult labour market and reduced immigration, housing prices and the S&P/TSX will decline.

According to the upside scenario, the economy will rebound more strongly thanks to medical breakthroughs that help fight COVID-19. Fiscal and monetary stimulus measures will limit the damage in terms of destroyed capacity. The unemployment rate at the end of 2020 will be only slightly above pre-recession levels. At year's end, declines in housing prices and the S&P/TSX will be less pronounced and the price of oil will bounce back.

According to the downside scenario, the uncertainties surrounding COVID-19 will provoke a deeper recession. Global trade will remain depressed for longer, and disappointing corporate earnings will inflict a new round of stress on the financial markets. The result will be greater destruction of capacity than in the base scenario. Consequently, the unemployment rate will remain at higher levels.

Given uncertainty surrounding the key inputs used to measure credit losses, the Bank has applied expert credit judgment to adjust the modelled ECL results.

For additional information, see the Economic Review and Outlook section of this MD&A and Note 7 to these consolidated financial statements.

#### Impact on Results

During the quarter ended July 31, 2020, despite the resumption of economic activity, several industries faced financial hardship because of social distancing rules and consumer fear, which severely impacted sales and led to many business closures, whereas other businesses saw an upturn in sales. The Bank's third-quarter net income nevertheless remained stable compared to the same quarter of 2019, as an increase in credit loss provisions was offset by good performance across most of the business segments. During the second quarter of 2020, major disruptions in the global environment in which the Bank operates affected its financial results, as there was a considerable increase in provisions for credit losses to reflect a significant deterioration in the macroeconomic conditions caused by COVID-19 and the expected impacts on our clients.

For additional information, refer to the "Financial Analysis" and "Business Segment Analysis" sections of this MD&A.

#### **Relief Measures for Clients**

In response to the economic and financial environment resulting from COVID-19 in March and April 2020, the Bank announced a series of support measures for the clients of its main business segments. During the quarter ended July 31, 2020, some of these measures were extended. Some of the measures were introduced by the Canadian government and regulatory authorities, together with the Canadian banks and were implemented quickly to come to the assistance of individuals and businesses. These measures are designed to provide financial support to clients facing the economic consequences of COVID-19. The main relief measures are described below.

#### Clients – Individuals

<b>Mortgages Personal loans</b>	<b>Credit cards</b>	<b>Transactions</b>
<ul style="list-style-type: none"> <li>• Payment deferrals of up to six months on mortgage loans (application date extended from June 30 to September 30, 2020).</li> <li>• Deferral of minimum payment for up to three months on home equity lines of credit (All-In-One™) (application date extended from June 30 to September 30, 2020).</li> <li>• Payment deferrals of up to three months on personal loans (application deadline: June 30, 2020).</li> </ul>	<ul style="list-style-type: none"> <li>• Deferral of minimum monthly payment for a period of up to 90 days.</li> <li>• Annual interest rate reduced to 10.9% on purchases and cash advances during the deferral period, depending on an analysis of the file.</li> <li>• Permanent or temporary increase to credit card limit.</li> </ul>	<ul style="list-style-type: none"> <li>• Temporary removal of certain transaction fees:                         <ul style="list-style-type: none"> <li>– Interac e-Transfer service charge (extended until September 30, 2020);</li> <li>– Charges for stop payment requests by cheque or preauthorized debit (extended until September 30, 2020);</li> <li>– Interest charges on an overdraft (extended until December 31, 2020).</li> </ul> </li> </ul>

Up until July 31, 2020, the Bank approved payment deferrals for approximately 125,000 Personal Banking clients. The gross carrying value of loans subject to these deferrals totalled \$10.0 billion for residential mortgages, \$788 million for personal loans, and \$81 million for credit card receivables (up until April 30, 2020, 114,000 Personal Banking clients and gross carrying value of \$8.6 billion for residential mortgages, \$756 million for personal loans, and \$66 million for credit card receivables). As at July 31, 2020, the gross carrying amount of Personal Banking loans still benefiting from deferral measures stood at \$3.7 billion for residential mortgages, at \$319 million for personal loans, and at \$15 million for credit card receivables (as at April 30, 2020, \$8.6 billion for residential mortgages, \$756 million for personal loans, and \$66 million for credit card receivables).

In addition, through its insurance subsidiary, the Bank offered easing measures on home and auto insurance products, including discounts of 15% for a period of three months. Approximately 31,800 clients elected to avail themselves of these easing measures as at July 31, 2020 (approximately 13,000 clients as at April 30, 2020).

**Clients – Businesses**

Loans	Credit cards	Transactions
<ul style="list-style-type: none"> <li>• Canada Emergency Business Account (CEBA) for small- and medium-sized enterprises and non-profit organizations: A \$40,000 interest-free loan up to December 31, 2022 supported by the Canadian government (Eligibility: have paid from \$20,000 to \$1.5 million in salaries in 2019 or have between \$40,000 and \$1.5 million in eligible expenses in 2019).</li> <li>• Concerted Temporary Action Program for Businesses (CTAPB): Working capital loan of at least \$71,500 supported by Investissement Québec (Eligibility: history of satisfactory profitability).</li> <li>• Business Credit Availability Program (BCAP) for exporting or non-exporting businesses, supported by Export Development Canada: Operating credit and cash flow term loans of up to \$6.25 million in Canadian dollars only.</li> <li>• Principal payment deferrals of up to six months.</li> </ul>	<ul style="list-style-type: none"> <li>• Deferral of minimum monthly payment for a period of up to 90 days on certain Business cards.</li> <li>• Contactless payments over \$100 at participating merchants.</li> </ul>	<ul style="list-style-type: none"> <li>• Increase to the weekly limit of incoming Interac e-transfers.</li> <li>• Temporary removal of charges for stop payment requests.</li> </ul>

As at July 31, 2020, the Bank granted 27,372 loans under its CEBA program, 43 loans under CTAPB, and 33 loans under BCAP (as at April 30, 2020, it had granted 20,714 loans under CEBA, 9 loans under CTAPB, and 5 loans under BCAP).

In addition, the Bank is addressing the specific needs of its Commercial Banking clients and Financial Markets clients to support them during this unprecedented crisis. Up until July 31, 2020, the Bank had approved payment deferrals for approximately 3,400 Commercial Banking and Financial Markets clients. The gross carrying value of loans subject to these deferrals totalled \$5.4 billion (up until April 30, 2020, approximately 3,100 clients and gross carrying value of \$4.5 billion). As at July 31, 2020, the gross carrying amount of Commercial Banking loans and Financial Markets segment loans still subject to deferral measures stood at \$4.5 billion (as at April 30, 2020, \$4.5 billion).

**Key Measures Introduced by the Regulatory Authorities**

Like all Canadian financial institutions, the Bank is facing regulatory changes that are being implemented at an increasing rate. As described below, as part of a coordinated effort by Government of Canada agencies, OSFI and other regulatory authorities governing the Bank's activities have taken a number of actions to reinforce the resilience of Canadian banks and improve the stability of the Canadian financial system and economy in response to challenges posed by COVID-19 and current market conditions. Regulatory authorities are also stepping up their oversight activities and focusing on the effects of the pandemic on the activities, capital strength, and liquidity of regulated entities.

OSFI, market participants, and financial institutions all recognize the critical need for strong capital and liquidity and effective risk management. OSFI has strengthened its requirements and its supervisory efforts in all of these areas since the 2008 global financial crisis. These measures have improved the resilience of Canadian banks in periods of stress.

OSFI continues to actively monitor the evolving COVID-19 situation and has been in frequent contact with banks to assess their operational capacity and actions to address the current environment. As a result of these discussions and the measures announced in March and April 2020, OSFI announced a continuance of the regulatory flexibility measures to support COVID-19-related efforts while promoting financial resilience and stability. The main key measures are described on the following pages.

### Capital Management

One of the requirements imposed by OSFI after the 2008 financial crisis was the creation of the Domestic Stability Buffer (the buffer) requirement applicable to Canadian domestic systemically important banks (D-SIBs). The buffer's countercyclical design enables D-SIBs to use the capital they have built up during good times when it may be needed most. On March 13, 2020, OSFI lowered the buffer from 2.25% of risk-weighted assets to 1.0%, effective immediately, and on June 23, 2020, it confirmed that the buffer requirement would remain at 1.0% until December 2020. This action is being taken in order to support D-SIBs' ability to supply credit to the economy during an expected period of disruption related to COVID-19 and market conditions. OSFI will continue to analyze the buffer level and could reduce it more as needed. OSFI also stated its commitment that any increases to the buffer will not take effect for at least 18 months from March 13, 2020 in addition to its expectation for all banks to interrupt any dividend increases and share buybacks for the time being.

On March 27, 2020, OSFI announced a series of additional measures for banks in response to the difficulties caused by the spread of COVID-19, including:

- Treatment of regulatory capital for expected credit loss (ECL) accounting purposes: As other regulatory agencies are doing, OSFI has introduced transitional arrangements applicable to the ECL provisioning method set out in the Basel framework. This will result in a portion of allowances that would otherwise be included in Tier 2 capital to be included in CET1 capital. Although the Basel Committee on Banking Supervision (BCBS) is allowing jurisdictions the option of applying a 100% add-back of allowances to CET1 capital, OSFI believes that a maximum add-back of 70% is appropriate. This increased amount is adjusted for tax effects and multiplied by a scaling factor that decreases over time. The scaling factor will be set at 70% in fiscal 2020, 50% in fiscal 2021, and 25% in fiscal 2022. The three-year transition will help banks to phase-in the impact of increased ECL allowances in CET1 capital while also acknowledging that these provisions are being taken.
- Deferral of loan payments: The bank loans subject to payment deferrals, such as mortgage loans, personal loans, and small business loans, continue to be treated as performing loans under the Capital Adequacy Requirement guideline. This is to assist banks in responding to clients managing through hardships caused by the crisis.
- Reduction of stressed Value-at-Risk (VaR) multipliers under market risk: On a temporary basis, banks subject to market risk capital requirements and using the AIRB approach may reduce the stressed VaR multiplier that was being applied at the end of first quarter 2020 by two. This reduction can be applied retrospectively to the beginning of the second quarter of 2020.
- Removal of funding valuation adjustment (FVA) hedges in market risk: Banks must remove hedges of FVA from the calculation of market risk capital. Doing so addresses an asymmetry in the current rule where these hedges of FVA are included in the calculation while the underlying exposures to FVA are not. This treatment should be back-dated to the beginning of the second quarter of 2020.
- Capital floor: OSFI is lowering the floor factor from 75% to 70%. The 70% floor factor is expected to stay in place until the domestic implementation of the Basel III capital floor in the first quarter of 2023. The 70% factor ensures that the floor continues to protect against model risk while maintaining the risk sensitivity of the capital framework for banks subject to the Advanced IRB approach.
- Leverage ratio: Banks can temporarily exclude the following exposures from the leverage ratio exposure measure: (1) Central bank reserves; (2) Sovereign-issued securities by borrowers that qualify as high-quality liquid assets (HQLA) under the *Liquidity Adequacy Requirements* guideline. This treatment will remain in place until April 30, 2021 unless OSFI decides to maintain the exclusion for a longer period. Capital freed up through this measure should not be distributed (e.g., as dividends or bonus payments) and should rather be used to support lending and financial intermediation activities.
- Margin required for non-centrally cleared derivatives: In line with a decision by the BCBS and International Organization of Securities Commissions, OSFI is extending the deadline for the implementation of the final two phases of the initial margin requirements for non-centrally cleared derivatives outlined in OSFI's E-22 guideline by one year. With this extension, the final implementation phase will take place on September 1, 2022, at which point covered entities with an aggregate average notional amount (AANA) of non-centrally cleared derivatives greater than \$12 billion will be subject to the requirements. As an intermediate step, from September 1, 2021, covered entities with an AANA of non-centrally cleared derivatives greater than \$75 billion will be subject to the requirements.
- Delaying implementation of the Basel III reforms: The Group of Central Bank Governors and Heads of Supervision (GHOS), which oversees the BCBS, announced a postponement to the implementation of the reforms of the Basel III capital international standard published in December 2017. OSFI has therefore postponed until the first quarter of 2023 the implementation dates applicable to the revisions to the Standardized Approach and AIRB Approach to credit risk, the operational risk framework, and the leverage ratio framework, as well as the introduction of a more risk-sensitive capital floor. Implementation of the Pillar 3 financial disclosure requirements finalized by the BCBS in December 2018 has also been delayed until at least the first quarter of 2023. Lastly, implementation of the final set of revisions to the new market risk framework entitled *Fundamental Review of the Trading Book* published in January 2019 as well as the revised credit valuation adjustment (CVA) risk framework is being delayed to the first quarter of 2024.

For additional information, refer to the Capital Management section of this MD&A.

### Liquidity Management

To help Canadians through this difficult period caused by the COVID-19 crisis, the Bank of Canada has taken policy actions designed to restore financial market functioning, to ensure that financial institutions have adequate liquidity, and to provide households and businesses with access to the credit they need. To ensure banks have sufficient liquidity to support clients and to alleviate impaired market liquidity in Canada, the central bank has implemented liquidity facilities and asset purchase programs. The liquidity facilities include the existing term repo facility where the terms of the loans have been extended and the list of eligible collateral has been expanded. Also, a new standing term liquidity facility (STLF) has been introduced to complement the existing liquidity tools and to further strengthen the resilience of the Canadian financial system. Asset purchase programs implemented by the Bank of Canada and the Canada Mortgage and Housing Corporation (CMHC) cover a wide range of securities (treasury bills, bankers' acceptances, bonds, and mortgage-backed securities) and issuers (government and corporate). All of these programs have stabilized the funding markets and supported the flow of credit to households and businesses.

The Bank of Canada has also used monetary policy to respond to the COVID-19 crisis. It has lowered its target for the overnight rate by 150 basis points to 0.25%. Longer-term interest rates have also gone down significantly, and the interest rates of the Government of Canada curve are now mostly below 1%. Also, the limit for covered bonds has been temporarily increased to provide better access to Bank of Canada facilities, and banks are allowed to draw on their HQLA assets, thereby falling below the 100% threshold required by the *Liquidity Adequacy Requirements* guideline for the liquidity coverage ratio (LCR).

The Bank entered the crisis with a strong liquidity position, and it has maintained sound and prudent liquidity management throughout the quarters ended July 31, 2020 and April 30, 2020. During the quarter ended April 30, 2020, the Bank participated in certain Bank of Canada programs designed to provide credit to its clients and to substitute some short-term funding. Given the sustained growth in deposits and improvements in capital markets, the Bank did not participate in the term repurchase program during the quarter ended July 31, 2020. In light of the government liquidity facilities and household and business needs, the Bank is maintaining a liquidity buffer that will enable it to further support its clients.

For additional information, refer to the Risk Management – Liquidity and Funding Risk section of the MD&A.

## Economic Review and Outlook

### Global Economy

After a sharp decline in economic activity following the measures taken by health authorities in the first and second quarters of 2020, the global economy has been recovering faster than expected, and the stress on financial markets has eased considerably. Despite these developments, the strength of the rebound varies greatly from one region to the next. There are several potential reasons for these differences: the seriousness of the epidemiological situation, exposure to the more seriously affected industries (such as tourism), and the magnitude of the fiscal and monetary responses from government authorities. Taking into consideration the catastrophic economic consequences of the pandemic and the unprecedented response from fiscal and monetary authorities, we maintain our global growth scenario for the year 2020 unchanged at (4.0)%<sup>(1)</sup>, which is more optimistic than the projections of the International Monetary Fund and the Bank of Canada. Some caution should nevertheless be exercised concerning the longer-term outlook. Unfortunately, the last few weeks have demonstrated that no country is immune to a resurgence of the coronavirus. Outbreaks may continue until a vaccine becomes available. In addition to the pandemic, the strained relationship between the White House and China poses another risk to economic recovery. In this context, a return to normal seems unlikely at any time in the near future.

In the near term, the U.S. economy is expected to continue to recover, stimulated by strong latent demand and second-quarter federal government payments to consumers that more than offset wage losses related to the sluggish labour market. This being said, it is difficult to foresee a sustainable recovery until there is evidence of a stronger rally in the service sector, and this will continue to depend on the epidemiological situation. Until a vaccine is brought to market, sectors in which social distancing is more difficult to achieve will be operating at a slower pace, despite the enormous assistance provided by the U.S. Federal Reserve. In the meantime, uncertainty hangs over a proposed extension to the financial support provided to workers who lost their jobs. Without this extension, their income may fall considerably in the coming months. We expect GDP to contract by 5.2%<sup>(1)</sup> in 2020 and then recover 3.5%<sup>(1)</sup> in 2021. However, this depends on U.S. legislators reaching an agreement on extending budget assistance measures.

### Canadian Economy

In Canada, the economic downturn in the first half of the year was much more pronounced than in the United States. However, a number of factors give reason to be optimistic about a stronger rally in the Canadian economy in the second half of the year. First, a gradual economic recovery, combined with a lower starting point due to tighter public health policies, will naturally lead to a more vigorous rebound in Canada. But there is more. A resurgence in the number of COVID-19 cases and the looming fiscal cliff suggest a more turbulent path in the United States at this point in time. Already, the labour market's faster recovery on this side of the border suggests that we will experience a more vigorous recovery in the third quarter. Retail and housing sales have returned to pre-crisis levels, suggesting a faster-than-expected return to normal. But it would be reckless to extrapolate this recent trend. First, latent demand had built up during the lockdown, and second, households have not yet suffered the consequences of the current economic difficulties. Consumers have benefited from deferred debt payments, and the income assistance programs established by the various levels of government have more than offset labour market losses. But governments cannot accumulate deficits of this magnitude indefinitely without jeopardizing the long-term sustainability of public finances. We maintain our growth forecast at (7.1)%<sup>(1)</sup> for 2020, with a 4.9%<sup>(1)</sup> rally in 2021.

### Quebec Economy

Since Quebec was the epicentre of the pandemic in Canada, the Quebec government was one of the first to declare the closure of non-essential services, applying a broader definition than what was used elsewhere in the country. This included closing the construction and mining sectors. In this context, Quebec's decline in employment from February to April was 18.7%, the worst of the ten provinces. However, the recovery has been stronger in Quebec. In July, employment was only 5.6% below the level recorded for February, which compares favourably to the 7.0% observed nationally. The province's unemployment rate was 9.5%, substantially below Canada's 10.9%. The recovery is expected to continue, but unused capacity in the labour market is expected to persist for some time, while some sectors where physical distancing remains an issue may continue to operate well below capacity. After two years in which Quebec's economic growth outpaced the national rate, we may see this situation reverse, with an average contraction of 8.0%<sup>(1)</sup> in 2020. We remain optimistic, however, that the economy will rally more strongly in the second half of the year, given the jump in the employment rate, especially among women. We expect economic activity to rebound with 5.5%<sup>(1)</sup> growth in 2021.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(2) The ratios as at July 31, 2020 include the transitional measures granted by OSFI. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A.

(3) The adjusted ratios as at July 31, 2020 do not include the transitional measure applicable to expected credit loss provisioning. For additional information, see the section entitled “COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities” on pages 7 to 9 of this MD&A.

## Financial Reporting Method

As stated in Note 2 to its audited annual consolidated financial statements for the year ended October 31, 2019, the Bank adopted IFRS 16 on November 1, 2019. As permitted by the IFRS 16 transitional provisions, the Bank elected to apply IFRS 16 using the modified retrospective basis, with no restatement of comparative periods. Note 2 to these consolidated financial statements presents the impacts of IFRS 16 adoption on the Bank's Consolidated Balance Sheet as at November 1, 2019 and additional information about the adoption of IFRS 16. Since interim consolidated financial statements do not include all of the annual financial statement disclosures required under IFRS, they should be read in conjunction with the audited annual consolidated financial statements and accompanying notes for the year ended October 31, 2019.

## Non-GAAP Financial Measures

The Bank uses a number of financial measures when assessing its results and measuring overall performance. Some of these financial measures are not calculated in accordance with GAAP, which are based on IFRS. Presenting non-GAAP financial measures helps readers to better understand how management analyzes results, shows the impacts of specified items on the results of the reported periods, and allows readers to assess results without the specified items if they consider such items not to be reflective of the underlying performance of the Bank's operations. The Bank cautions readers that it uses non-GAAP financial measures that do not have standardized meanings under GAAP and therefore may not be comparable to similar measures used by other companies.

Like many other financial institutions, the Bank uses the taxable equivalent basis to calculate net interest income, non-interest income, and income taxes. This calculation method consists of grossing up certain tax-exempt income (particularly dividends) by the income tax that would have been otherwise payable. An equivalent amount is added to income taxes. This adjustment is necessary in order to perform a uniform comparison of the return on different assets regardless of their tax treatment.

Fiscal 2020 is being marked by the effects of the COVID-19 pandemic on macroeconomic factors, which resulted in a significant increase in the Bank's provisions for credit losses. Given the materiality of the provisions for credit losses recorded in accordance with IFRS, the Bank believes it is useful to show income before provisions for credit losses and income taxes, income before provisions for credit losses and income taxes on a taxable equivalent basis as well as income before provisions for credit losses and income taxes on a taxable equivalent basis and excluding specified items (as presented in the Consolidated Results table on page 14 and in the Results by Segment tables on pages 17 to 21), thereby providing readers with additional information to help them better understand the main components of the financial results of the Bank and its business segments.

(1) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

(2) During the nine-month period ended July 31, 2020, the Bank recorded a charge of \$13 million (\$10 million net of income taxes) related to Maple Financial Group Inc. (Maple) in the *Other* heading of segment results following the event that occurred in December 2019, as described in the Contingent Liabilities section on page 25 of this MD&A.

(3) During the quarter ended July 31, 2019, following the Bank's disposal of a portion of its investment in Fiera Capital Corporation (Fiera Capital), a gain on disposal of \$79 million (\$68 million net of income taxes), including a gain of \$31 million (\$27 million net of income taxes) upon remeasurement at fair value of the retained interest, was recorded in the *Other* heading of segment results.

(4) During the quarter ended July 31, 2019, the Bank completed the sale of its head office land and building located at 600 De La Gauchetière West, Montreal, Quebec, Canada, for gross proceeds of \$187 million, and a gain on disposal of premises and equipment of \$50 million (\$43 million net of income taxes) was recorded in the *Other* heading of segment results.

(5) During the quarter ended July 31, 2019, the Bank remeasured at fair value its investment in NSIA Participations (NSIA) and recorded a loss of \$33 million (\$27 million net of income taxes) in the *Other* heading of segment results.

(6) During the quarter ended July 31, 2019, the Bank recorded \$57 million (\$42 million net of income taxes) in impairment losses on premises and equipment and on intangible assets related to computer equipment and technology developments in the *Other* heading of segment results.

(7) During the quarter ended July 31, 2019, the Bank reviewed all of its corporate building leases and recorded provisions for onerous contracts of \$45 million (\$33 million net of income taxes) in the *Other* heading of segment results.

(8) During the quarter ended July 31, 2019, following an optimization of certain organizational structures, the Bank recorded \$10 million (\$7 million net of income taxes) in severance pay.

## Financial Results

For the third quarter of 2020, National Bank is reporting net income of \$602 million compared to \$608 million in the third quarter of 2019. Third-quarter diluted earnings per share stood at \$1.66, unchanged from \$1.66 in the third quarter of 2019. Income before provisions for credit losses and income taxes<sup>(1)</sup> totalled \$894 million in the third quarter of 2020, a 13% year-over-year increase driven by revenue growth in the Wealth Management segment, Financial Markets segment, and U.S. Specialty Finance and International (USSF&I) segment.

Net income excluding specified items<sup>(1)</sup> totalled \$602 million in the third quarter of 2020, down 1% from \$606 million in the third quarter of 2019. Third-quarter diluted earnings per share excluding specified items<sup>(1)</sup> stood at \$1.66, unchanged from \$1.66 in the same quarter of 2019. For the third quarter of 2019, the specified items, net of income taxes, had included a \$68 million gain on disposal of Fiera Capital shares, a \$43 million gain on disposal of premises and equipment, a \$27 million loss on the remeasurement at fair value of the Bank's investment in NSIA, \$42 million in impairment losses on premises and equipment and on intangible assets, \$33 million in provisions for onerous contracts, and \$7 million in severance pay.

For the nine months ended July 31, 2020, the Bank's net income totalled \$1,591 million, down 7% from \$1,718 million in the same period of 2019. For the nine months ended July 31, 2020, the Bank's diluted earnings per share stood at \$4.34, down 7% from \$4.67 in the same period of 2019. These decreases were essentially due to higher provisions for credit losses recorded in second quarter 2020 to reflect the impacts of COVID-19. However, income before provisions for credit losses and income taxes on a taxable equivalent basis and excluding specified items<sup>(1)</sup> totalled \$2,870 million for the nine-month period ended July 31, 2020, a 12% year-over-year increase driven by revenue growth in all business segments. Nine-month diluted earnings per share excluding specified items<sup>(1)</sup> stood at \$4.37 compared to \$4.67 in the same nine-month period of 2019. The 2020 nine-month specified item, net of income taxes, consisted of a \$10 million charge related to Maple. The nine-month specified items recorded in 2019, in a net amount of \$2 million, net of income taxes, are the same as those mentioned for the quarter.

Return on common shareholders' equity excluding specified items<sup>(1)</sup> was 15.4% for the nine months ended July 31, 2020 compared to 17.9% in the same nine-month period of 2019.

## Total Revenues

For the third quarter of 2020, the Bank's total revenues amounted to \$1,968 million, rising \$20 million or 1% year over year. The Personal and Commercial Banking segment's third-quarter total revenues were down 4% due to a smaller net interest margin, partly offset by growth in loan and deposit volumes, as well as to decreases in credit card revenues, in revenues from deposit and payment service charges, and in revenues from derivative financial instruments and foreign exchange activities. Insurance revenues were also down year over year, as a revision to actuarial reserves had had a more favourable impact in the third quarter of 2019. The Wealth Management segment's third-quarter total revenues were up 3% owing mainly to an increase in transaction-based and other revenues. In the Financial Markets segment, total revenues on taxable equivalent basis<sup>(1)</sup> rose 14% owing to an increase in global markets revenues and corporate and investment banking revenues. And the USSF&I segment's total revenues rose 21%, owing to revenue growth at the ABA Bank subsidiary and the Credigy subsidiary. The 2019 third-quarter total revenues had included the following specified items: a \$79 million gain on disposal of Fiera Capital shares, a \$50 million gain on disposal of premises and equipment, and a \$33 million loss arising from the remeasurement at fair value of the Bank's investment in NSIA. Total revenues on a taxable equivalent basis and excluding specified items<sup>(1)</sup> amounted to \$2,021 million in the third quarter of 2020, up 4% from \$1,946 million in the third quarter of 2019.

For the nine months ended July 31, 2020, total revenues amounted to \$5,927 million, up \$410 million or 7% from \$5,517 million for the same period of 2019. The Personal and Commercial Banking segment's nine-month total revenues were up slightly by \$4 million, as the growth in net interest income was offset by lower credit card revenues and lower revenues from deposit and payment service charges, with these decreases being essentially related to the pandemic, as well as by lower insurance revenues. The Bank's increase in total nine-month revenues was partly due to higher fee-based revenues and higher transaction-based and other revenues in the Wealth Management segment. In the Financial Markets segment, nine-month total revenues on a taxable equivalent basis<sup>(1)</sup> rose \$303 million year over year, mainly due to an increase in global markets revenues. Lastly, in the USSF&I segment, nine-month total revenues were up 12%, as business growth at ABA Bank drove higher loan and deposit volumes, whereas Credigy's nine-month revenues declined year over year. The Bank's total revenues recorded for the nine-month period ended July 31, 2019 had included the same specified items as those mentioned for the quarter. Nine-month total revenues on a taxable equivalent basis and excluding specified items<sup>(1)</sup> amounted to \$6,143 million, up 9% from \$5,658 million in the same period of 2019.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

### Non-Interest Expenses

For the third quarter of 2020, non-interest expenses stood at \$1,074 million, a 7% year-over-year decrease that was essentially due to the specified items recorded in the third quarter of 2019, which had included \$57 million in impairment losses on premises and equipment and on intangible assets, \$45 million in provisions for onerous contracts, and \$10 million in severance pay. Also contributing to this third-quarter decrease in non-interest expenses was a reduction to the variable compensation provision as well as a decrease in certain variable expenses and other discretionary costs. These decreases were somewhat offset by expenses incurred by the Bank to deploy pandemic-related health and safety measures for employees and clients as well as by an increase in the technology expenses incurred for the Bank's transformation plan and business development purposes. Third-quarter non-interest expenses excluding specified items<sup>(1)</sup> stood at \$1,074 million, up 3% from \$1,042 million in the third quarter of 2019.

For the nine months ended July 31, 2020, non-interest expenses stood at \$3,286 million, a 2% year-over-year increase that was essentially due to higher compensation and employee benefits, in particular the variable compensation associated with revenue growth in the Wealth Management segment, Financial Markets segment, and USSF&I segment, to the expenses incurred by the Bank to deploy pandemic-related measures, and to an increase in the technology investments made by the Bank for its transformation plan and business development purposes. In addition, the 2020 nine-month other expenses included a \$13 million charge related to Maple. These increases were tempered by the \$57 million in impairment losses on premises and equipment and on intangible assets, the \$45 million in provisions for onerous contracts, and the \$10 million in severance pay that had been recorded in the same nine-month period of 2019. Non-interest expenses excluding specified items<sup>(1)</sup> stood at \$3,273 million for the nine months ended July 31, 2020, up 6% from \$3,094 million in the same nine-month period of 2019.

### Provisions for Credit Losses

For the third quarter of 2020, the Bank recorded \$143 million in provisions for credit losses compared to \$86 million in the same quarter of 2019. The increase in provisions for credit losses was attributable as much to the non-impaired as the impaired loans of Personal Banking, while the credit loss provisions on impaired loans were up in both Commercial Banking and in the Financial Markets segment. This increase was tempered by a decrease in provisions on impaired loans for credit card receivables as well as on impaired loans recorded by the Credigy subsidiary.

For the nine months ended July 31, 2020, the Bank recorded \$736 million in provisions for credit losses compared to \$258 million in the same period of 2019. This considerable increase mainly reflects a significant deterioration in the macroeconomic outlook (in particular GDP growth, the unemployment rate, and oil prices) caused by COVID-19 in the second quarter of 2020 and the expected impacts of the pandemic on the Bank's clients. The higher credit loss provisions on impaired loans recorded by Commercial Banking and by the Financial Markets segment were tempered somewhat by a decrease in the credit loss provisions on impaired loans recorded by the Credigy subsidiary as a result of repayments and maturities in certain loan portfolios.

### Income Taxes

For the third quarter of 2020, income taxes stood at \$149 million compared to \$100 million in the same quarter of 2019. The 2020 third-quarter effective tax rate was 20% compared to 14% in the same quarter of 2019. This change in effective tax rate stems from a lower proportion of income from lower tax rate jurisdictions and of tax-exempt dividend income compared to the same quarter of 2019 and from the realization of capital gains taxed at a lower rate in the third quarter of 2019.

For the nine months ended July 31, 2020, the effective tax rate was 16%, unchanged from the same nine-month period of 2019.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

## Results by Segment

The Bank carries out its activities in four business segments: Personal and Commercial, Wealth Management, Financial Markets, and U.S. Specialty Finance and International. For presentation purposes, other operating activities, certain non-recurring items and Treasury activities are grouped in the *Other* heading. Each reportable segment is distinguished by services offered, type of clientele, and marketing strategy.

(1) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

(2) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(3) Net interest margin is calculated by dividing net interest income by average interest-bearing assets.

(4) Net impaired loans are presented net of allowances for credit losses on Stage 3 loan amounts drawn.

In the Personal and Commercial segment, net income totalled \$233 million in the third quarter of 2020 compared to \$274 million in the third quarter of 2019. This decrease stems from a \$39 million or 4% decrease in total revenues and a \$22 million increase in provisions for credit losses. Third-quarter revenues were also down, as there was a \$4 million decline in net interest income due to lower interest rates that more than offset growth in personal and commercial loan and deposit volumes, and non-interest income decreased \$35 million, partly due to a decline in credit card revenues.

Personal Banking's third-quarter total revenues declined \$28 million year over year. A decrease in net interest income, caused by smaller loan and deposit margins, and a decrease in both credit card revenues and insurance revenues were partly offset by higher loan and deposit volumes. Commercial Banking's third-quarter total revenues were down \$11 million given a decrease in revenues from derivative financial instruments and from foreign exchange activities.

For the third quarter of 2020, the Personal and Commercial segment's non-interest expenses stood at \$457 million, down 1% from the third quarter of 2019. An increase in compensation and employee benefits was more than offset by a decrease in certain variable expenses, notably business development expenses, given the social distancing and lockdown measures imposed by governments. At 53.6%, the third-quarter efficiency ratio declined by 1.9 percentage points compared to the third quarter of 2019. The segment recorded \$79 million in provisions for credit losses, a \$22 million year-over-year increase related mainly to higher provisions on Commercial Banking loans, notably provisions on impaired loans, as well as to provisions on Personal Banking loans and on credit card receivables.

For the nine months ended July 31, 2020, net income generated by the Personal and Commercial segment totalled \$549 million, down from \$746 million in the same nine-month period of 2019. This decrease stems essentially from the impacts of the COVID-19 pandemic, in particular the considerable increase in provisions for credit losses recorded in the second quarter of 2020 to reflect a significant deterioration in the macroeconomic outlook and the expected impacts on the segment's clients. The segment's income before provisions for credit losses and income taxes<sup>(1)</sup> increased \$2 million, and its total revenues increased \$4 million. Personal Banking's nine-month total revenues were down, mainly due to a decrease in credit card revenues, as credit card transactions declined due to pandemic-related circumstances, as well as to narrower margins on loans and deposits, partly offset by growth in loan and deposit volumes. As for Commercial Banking, its nine-month total revenues were up owing to growth in loan and deposit volumes as well as to an increase in bankers' acceptance revenues. The segment's nine-month non-interest expenses stood at \$1,384 million, relatively stable compared to the same nine-month period of 2019. Higher compensation and employee benefits and higher technology expenses were partly offset by lower operations support charges and the segment's amortization expense. The nine-month efficiency ratio was 53.6%, unchanged from the same period of 2019.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

For the nine-month period ended July 31, 2020, the segment's provisions for credit losses were up \$272 million year over year, as higher provisions were recorded on non-impaired Personal Banking and Commercial Banking loans and on non-impaired credit card receivables to reflect the significant deterioration in the macroeconomic outlook in the second quarter of 2020 caused by COVID-19 and the expected impacts of the pandemic on the segment's clients. Provisions for credit losses on Commercial Banking's impaired loans were also up when compared to the same nine-month period in 2019.

Efficiency ratio	60.9 %	61.3 %		60.0 %	61.8 %	

(1) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

(2) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(3) Net impaired loans are presented net of allowances for credit losses on Stage 3 loan amounts drawn.

In the Wealth Management segment, net income totalled \$128 million in the third quarter of 2020, a 2% increase from \$125 million in the same quarter of 2019. The segment's third-quarter total revenues amounted to \$450 million, up \$13 million or 3% from \$437 million in the third quarter of 2019. This increase in revenues was mainly driven by an 18% increase in transaction-based and other revenues given greater trading volume and by a 3% increase in fee-based revenues due to year-over-year growth in the volume of assets under administration and under management. As for the segment's net interest income, it was down 5% as a result of lower interest rates.

For the third quarter of 2020, the segment's non-interest expenses stood at \$274 million, a 2% year-over-year increase arising mainly from higher compensation and employee benefits, notably the variable compensation associated with growth in the segment's revenues. At 60.9%, the third-quarter efficiency ratio improved by 0.4 percentage points when compared to the third quarter of 2019. For the third quarter of 2020, the segment recorded \$2 million in provisions for credit losses compared to a negligible amount in the same quarter of 2019.

For the first nine months of 2020, the Wealth Management segment's net income totalled \$404 million, up 11% from \$365 million in the same nine-month period of 2019. The segment's total revenues amounted to \$1,389 million for the nine months ended July 31, 2020, up 7% from \$1,297 million in the same period of 2019. The increase in fee-based revenues was due to growth in average assets under management and administration as a result of net inflows into various solutions and stronger stock market performance in the nine-month period ended July 31, 2020. Nine-month transaction-based and other revenues grew 22% year over year owing to an increase in trading volume resulting from stock market volatility during this period. Net interest income was down as a result of smaller deposit margins. Nine-month non-interest expenses stood at \$834 million compared to \$802 million in the same period of 2019, with the increase resulting from higher compensation and employee benefits and higher operations support charges related to the segment's initiatives. At 60.0%, the nine-month efficiency ratio improved from 61.8% in the same nine-month period of 2019. The segment's nine-month credit loss provisions were up \$6 million year over year, essentially since provisions for credit losses on non-impaired loans were recorded during the second quarter of 2020 to reflect a significant deterioration in the macroeconomic outlook caused by COVID-19.

(2) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

(3) Net impaired loans are presented net of allowances for credit losses on Stage 3 loan amounts drawn.

In the Financial Markets segment, net income totalled \$188 million in the third quarter of 2020, up 5% from \$179 million in the third quarter of 2019. Total revenues on a taxable equivalent basis<sup>(1)</sup> amounted to \$503 million, up 14% from \$441 million in the third quarter of 2019. Third-quarter global markets revenues grew 13% year over year, as revenues from fixed-income securities were up 62% while revenues from equities and from commodities and foreign exchange activities declined slightly. As for corporate and investment banking revenues, they increased 16% year over year due to higher revenues generated by capital markets activities, particularly revenues from government bond issuances and banking services revenues, which were partly offset by lower revenues from merger and acquisition activities.

For the third quarter of 2020, the segment's non-interest expenses stood at \$206 million, a 10% year-over-year increase that was essentially due to higher variable compensation associated with revenue growth in the third quarter of 2020 as well as to higher operations support charges. At 41.0%, the third-quarter efficiency ratio on a taxable equivalent basis<sup>(1)</sup> improved by 1.4 percentage points compared to 42.4% in the third quarter of 2019. The segment's third-quarter provisions for credit losses stood at \$41 million compared to \$10 million in the same quarter of 2019. This increase came mainly from provisions on impaired loans in an amount of \$21 million. Provisions for credit losses on non-impaired loans also increased, due in part to new loans granted in the third quarter of 2020.

For the nine months ended July 31, 2020, the segment's net income totalled \$531 million, up 5% year over year. Growth across all of the segment's revenue categories was tempered by higher provisions for credit losses recorded in the second quarter of 2020 to reflect a significant deterioration in the macroeconomic outlook caused by COVID-19 and the expected impacts on this segment's clients. Nine-month total revenues on a taxable equivalent basis<sup>(1)</sup> amounted to \$1,559 million versus \$1,256 million for the nine months ended July 31, 2019. Income before provisions for credit losses and income taxes on a taxable equivalent basis<sup>(1)</sup> increased by \$225 million or 32% for the nine-month period ended July 31, 2020 compared to the same period in 2019. Nine-month revenues generated by the global markets category increased 35% year over year, with the growth coming from all revenue categories. As for corporate and investment banking revenues, they were up 9% year over year due to revenue growth generated by capital markets activities, in particular issuances of government bonds, and merger and acquisition activities.

Nine-month non-interest expenses rose \$78 million or 14% year over year, due to an increase in compensation and employee benefits, higher transaction costs associated with business growth and expenses incurred for technology investments. At 40.1%, the nine-month efficiency ratio on a taxable equivalent basis<sup>(1)</sup> improved from 43.6% in the same period of 2019. The segment recorded \$212 million in provisions for credit losses during the nine-month period ended July 31, 2020 compared to \$20 million during the same nine-month period of 2019, an increase that stems mainly from credit loss provisions on the non-impaired loans recorded during the second quarter of 2020 in response to the economic environment created by COVID-19. Furthermore, the provisions for credit losses on impaired loans were up \$47 million compared to the same nine-month period in 2019.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(2) Net impaired loans – Stage 3 exclude POCI loans and are presented net of allowances for credit losses on Stage 3 loan amounts drawn.

In the USSF&I segment, net income totalled \$87 million in the third quarter of 2020, a 26% increase from \$69 million in the same quarter of 2019. For the nine months ended July 31, 2020, the segment generated net income of \$246 million, a 22% increase from \$201 million in the same nine-month period of 2019. Revenue growth generated by the ABA Bank subsidiary was tempered somewhat by a decline in revenues generated by the Credigy subsidiary, whose results have been affected by the economic environment created by the global pandemic during the nine-month period ended July 31, 2020.

### Credigy

For the third quarter of 2020, the Credigy subsidiary's net income totalled \$41 million, a 17% increase from the same quarter of 2019. Credigy's third-quarter total revenues amounted to \$104 million, up from \$95 million in the third quarter of 2019 due to growth in loan volumes. Credigy's third-quarter non-interest expenses stood at \$36 million, stable compared to the third quarter of 2019. It recorded \$16 million in credit loss provisions for the third quarter of 2020 compared to \$15 million in the same quarter of 2019. The increase in credit loss provisions on non-impaired loans related to the impacts of the COVID-19 pandemic was tempered somewhat by a decrease in the credit loss provisions on impaired loans.

For the nine months ended July 31, 2020, the Credigy subsidiary's net income totalled \$103 million, down 9% from the same period of 2019. Credigy's nine-month total revenues amounted to \$284 million, down from \$307 million in the same period of 2019 arising from changes in the loan portfolio mix and the impacts of COVID-19. Its nine-month non-interest expenses were down \$8 million as a result of a decrease in variable compensation and collection costs. Credigy recorded \$47 million in provisions for credit losses for the nine-month period ended July 31, 2020, down \$3 million from the same period of 2019. The increase in provisions on non-impaired loans that resulted from a significant deterioration in the macroeconomic outlook caused by COVID-19 and the expected impacts of the pandemic on the subsidiary's portfolios was more than offset by a decrease in provisions on impaired loans arising from repayments and maturities in certain loan portfolios and revaluations of certain portfolios.

### ABA Bank

For the third quarter of 2020, the ABA Bank subsidiary's net income totalled \$46 million, rising 35% from the third quarter of 2019. A 33% increase in ABA Bank's third-quarter revenues was driven by sustained growth in loan and deposit volumes. The subsidiary's third-quarter non-interest expenses rose 27% year over year, mainly due to its growing banking network. It recorded \$5 million in credit loss provisions for the third quarter of 2020 compared to \$4 million in the same quarter of 2019.

For the nine months ended July 31, 2020, the ABA Bank subsidiary's net income totalled \$141 million, up 62% from the same period of 2019. Year over year, ABA Bank's nine-month total revenues rose 40% and its nine-month non-interest expenses rose 37%, with both increases being attributable to growth in its business activities. For the nine-month period ended July 31, 2020, the subsidiary recorded \$16 million in provisions for credit losses, up \$6 million from the same period of 2019 and reflecting the expected impacts of the global pandemic on the subsidiary's clients.

The subsidiary's effective tax rate was down in the nine-month period ended July 31, 2020 due to tax incentive measures granted by the Cambodian government and recorded during the second quarter of 2020.

## Other

(taxable equivalent basis)<sup>(1)</sup>  
(millions of Canadian dollars)

	Quarter ended July 31		Nine months ended July 31	
	2020	2019 <sup>(2)</sup>	2020	2019 <sup>(2)</sup>
<b>Operating results</b>				
Net interest income on a taxable equivalent basis	(51)	(45)	(122)	(138)
Non-interest income on a taxable equivalent basis	57	144	149	240
Total revenues on a taxable equivalent basis	6	99	27	102
Non-interest expenses	58	169	204	264
Income before provisions for credit losses and income taxes on a taxable equivalent basis <sup>(1)</sup>	(52)	(70)	(177)	(162)
Provisions for credit losses	–	–	5	–
Income before income taxes on a taxable equivalent basis	(52)	(70)	(182)	(162)

<b>Net loss</b>	<b>(34)</b>	<b>(39)</b>	<b>(139)</b>	<b>(99)</b>
Non-controlling interests	3	6	17	19
Net loss attributable to the Bank's shareholders	(37)	(45)	(156)	(118)
Specified items after income taxes <sup>(1)</sup>	–	2	(10)	2
<b>Net loss excluding specified items<sup>(1)</sup></b>	<b>(34)</b>	<b>(41)</b>	<b>(129)</b>	<b>(101)</b>
Average assets	60,988	41,477	53,683	44,426

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

(2) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

For the *Other* heading of segment results, there was a net loss of \$34 million in the third quarter of 2020 compared to a net loss of \$39 million in the same quarter of 2019. The change in net loss was primarily driven by a greater contribution made by treasury activities in the third quarter of 2020. In addition, the expenses incurred by the Bank to implement health and safety measures for employees and clients in response to the exceptional circumstances created by COVID-19 and the increase in technology investments made for the Bank's transformation plan and business development activities were partly offset by a decrease in the variable compensation provision recorded in the third quarter of 2020 and also by decreases in certain variable expenses and other discretionary costs. For the third quarter of 2019, the specified items had included a \$79 million gain on disposal of Fiera Capital shares, a \$50 million gain on disposal of premises and equipment, a \$33 million loss on the remeasurement at fair value of the Bank's investment in NSIA, \$57 million in impairment losses on premises and equipment and intangible assets, \$45 million in provisions for onerous contracts, and \$10 million in severance pay. These items, net of income taxes, had a \$2 million favourable impact on the net income in the *Other* heading in the third quarter of 2019. The third-quarter net loss excluding specified items<sup>(1)</sup> was \$34 million compared to a \$41 million net loss in the same quarter of 2019.

For the nine months ended July 31, 2020, net loss stood at \$139 million compared to a net loss of \$99 million in the same nine-month period of 2019. This change in net loss came mainly from expenses incurred by the Bank to implement pandemic-related health and safety measures for employees and clients, an increase in technology investments made for the Bank's transformation plan and for business development activities, as well as the Maple-related charge recorded during the first quarter of 2020, which more than offset the year-over-year increase in the contribution made by treasury activities. The specified items for the nine-month period ended July 31, 2020, which include the Maple-related charge recorded during the first quarter, had a \$10 million unfavourable impact on the net income in the *Other* heading. The specified items recorded for the nine-month period ended July 31, 2019 are the same as those provided for the quarter. The nine-month net loss excluding specified items<sup>(1)</sup> was \$129 million compared to a \$101 million net loss in the same period of 2019.

(1) See the Financial Reporting Method section on pages 12 and 13 for additional information on non-GAAP financial measures.

## Consolidated Balance Sheet

### Consolidated Balance Sheet Summary

(millions of Canadian dollars)	As at July 31, 2020	As at October 31, 2019	% Change

	<b>322,453</b>	<b>281,458</b>	<b>15</b>

#### Assets

As at July 31, 2020, the Bank had total assets of \$322.5 billion, rising \$41.0 billion or 15% from \$281.5 billion as at October 31, 2019. Cash and deposits with financial institutions, totalling \$29.1 billion as at July 31, 2020, increased \$15.4 billion, mainly due to deposits with the Bank of Canada as well as deposits with financial institutions. The increase in deposits with the Bank of Canada stems partly from the liquidity obtained as part of financing initiatives implemented by the Canadian government through the Bank of Canada, the objective of which is to support the Canadian financial system during the COVID-19 pandemic.

Since October 31, 2019, securities rose \$15.4 billion due to an \$11.0 billion or 18% increase in securities at fair value through profit or loss, particularly securities issued or guaranteed by Treasury, other U.S. agencies, and other foreign governments, and due to a \$4.4 billion increase in securities other than those measured at fair value through profit or loss. Securities purchased under reverse repurchase agreements and securities borrowed decreased by \$5.0 billion, mainly related to the activities of the Financial Markets segment and Treasury.

Totalling \$161.8 billion as at July 31, 2020, loans and acceptances, net of allowances, rose \$8.5 billion or 6% since October 31, 2019. The following table provides a breakdown of the main loan and acceptance portfolios.

(millions of Canadian dollars)	As at July 31, 2020	As at October 31, 2019	As at July 31, 2019
<b>Loans and acceptances</b>			
Residential mortgage and home equity lines of credit	85,608	80,214	78,744
Personal	13,387	13,901	14,185
Credit card	2,012	2,322	2,322
Business and government	61,854	57,492	56,784
	<b>162,861</b>	<b>153,929</b>	<b>152,035</b>
Allowances for credit losses	(1,108)	(678)	(687)
	<b>161,753</b>	<b>153,251</b>	<b>151,348</b>

Residential mortgages (including home equity lines of credit) were up \$5.4 billion or 7% compared to October 31, 2019 due to sustained demand for mortgage credit as well as to business growth at the ABA Bank subsidiary. Since October 31, 2019, personal loans and credit card receivables decreased by \$0.5 billion and \$0.3 billion, respectively, while loans and acceptances to business and government were up \$4.4 billion or 8% owing to growth in corporate financial services activities and to growth at the Credigy subsidiary.

When compared to July 31, 2019, loans and acceptances grew \$10.4 billion or 7%, while residential mortgages (including home equity lines of credit) were up \$6.9 billion or 9% due to sustained demand for mortgage credit and to business growth at the ABA Bank subsidiary. Also compared to a year ago, personal loans were down 6%, a decrease related in part to the Credigy subsidiary following repayments and maturities of certain loan portfolios, and credit card receivables were down \$0.3 billion, whereas loans and acceptances to business and government grew \$5.1 billion or 9% owing to Commercial Banking activities, Financial Markets activities, and Credigy activities.

Impaired loans include loans classified in Stage 3 of the expected credit loss model and the purchased or originated credit-impaired (POCI) loans of the Credigy subsidiary. As at July 31, 2020, gross impaired loans excluding POCI loans stood at \$794 million compared to \$684 million as at October 31, 2019. Net impaired loans excluding POCI loans stood at \$453 million as at July 31, 2020 compared to \$450 million as at October 31, 2019, a \$3 million increase related mainly to increases in the net impaired loans of the personal loan portfolios as well as the portfolios of the Wealth Management segment, the Financial Markets segment, and the ABA Bank subsidiary, tempered somewhat by a decrease in the net impaired loans of the commercial loan portfolios. Gross POCI loans stood at \$949 million as at July 31, 2020, whereas they had stood at \$1,166 million as at October 31, 2019 as a result of repayments and maturities of certain loan portfolios.

At \$21.3 billion as at July 31, 2020, other assets increased by \$6.7 billion or 46% since October 31, 2019. This increase stems mainly from an increase in derivative financial instruments related to the activities of the Financial Markets segment.

### **Liabilities**

As at July 31, 2020, the Bank had total liabilities of \$307.0 billion compared to \$266.3 billion as at October 31, 2019.

The Bank's total deposit liability stood at \$205.5 billion as at July 31, 2020, rising \$15.9 billion from \$189.6 billion as at October 31, 2019. At \$66.2 billion as at July 31, 2020, personal deposits increased \$6.1 billion since October 31, 2019. This increase stems from Personal Banking activities, the Wealth Management segment's brokerage accounts, and business growth at the ABA Bank subsidiary.

Business and government deposits totalled \$134.7 billion as at July 31, 2020, rising \$9.4 billion from October 31, 2019. This increase came from the funding activities of the Financial Markets segment and of Treasury, including \$4.5 billion in deposits subject to bank recapitalization (bail-in) conversion regulations, from the Wealth Management segment's brokerage activities, as well as from Commercial Banking's activities.

At \$4.6 billion as at July 31, 2020, deposits from deposit-taking institutions rose \$0.4 billion since October 31, 2019.

As at July 31, 2020, other liabilities stood at \$100.7 billion, a \$24.7 billion or 33% increase since October 31, 2019 that was due to a \$3.8 billion increase in obligations related to securities sold short, a \$14.0 billion increase in obligations related to securities sold under repurchase agreements and securities loaned, as well as a \$7.2 billion increase in derivative financial instruments.

### **Equity**

As at July 31, 2020, equity attributable to the Bank's shareholders was \$15.5 billion, rising \$0.7 billion from October 31, 2019. This increase came essentially from net income net of dividends, from issuances of common shares under the Stock Option Plan, and from remeasurements of pension plans and other post-employment benefit plans. These increases were partly offset by accumulated other comprehensive income, in particular losses on cash flow hedges. Lastly, non-controlling interests were down \$367 million, essentially due to the redemption of trust units issued by NBC Asset Trust for a gross amount of \$350 million.

## Exposures to Certain Activities

The recommendations made by the Financial Stability Board's Enhanced Disclosure Task Force (EDTF) seek to enhance the transparency and measurement of certain exposures, in particular structured entities, subprime and Alt-A exposures, collateralized debt obligations, residential and commercial mortgage-backed securities, and leveraged financing structures. The Bank does not market any specific mortgage financing program to subprime or Alt-A clients. The Bank does not have any significant direct position in residential and commercial mortgage-backed securities that are not insured by the CMHC. Credit derivative positions are presented in the *Supplementary Regulatory Capital and Pillar 3 Disclosure* report, which is available on the Bank's website at [nbc.ca](http://nbc.ca).

Leveraged finance is commonly employed to achieve a specific objective, for example, to make an acquisition, complete a buy-out or repurchase shares. Leveraged finance risk exposure takes the form of both funded and unfunded commitments. As at July 31, 2020, total commitments for this type of loan stood at \$3,629 million (\$3,559 million as at October 31, 2019). Details about other exposures are provided in the table on structured entities in Note 27 to the audited annual consolidated financial statements for the year ended October 31, 2019.

## Related Party Transactions

The Bank's policies and procedures regarding related party transactions have not significantly changed since October 31, 2019. For additional information, see Note 28 to the audited annual consolidated financial statements for the year ended October 31, 2019.

## Securitization and Off-Balance-Sheet Arrangements

In the normal course of business, the Bank is party to various financial arrangements that, under IFRS, are not required to be recorded on the Consolidated Balance Sheet or are recorded at amounts other than their notional or contractual values. These arrangements include, among others, transactions with structured entities, derivative financial instruments, issuances of guarantees, credit instruments, and financial assets received as collateral. A complete analysis of these types of arrangements, including their nature, business purpose and importance, is provided on pages 48 and 49 of the *2019 Annual Report*.

For additional information on guarantees, commitments and structured entities, see Notes 26 and 27 to the audited annual consolidated financial statements for the year ended October 31, 2019. For additional information about financial assets transferred but not derecognized, see Note 8 to these consolidated financial statements.

## Income Taxes

In April 2020, the Bank was reassessed by the Canada Revenue Agency (CRA) for additional income tax and interest of approximately \$240 million (including estimated provincial tax and interest) in respect of certain Canadian dividends received by the Bank during 2015.

In prior fiscal years, the Bank was reassessed for additional income tax and interest of approximately \$370 million (including provincial tax and interest) in respect of certain Canadian dividends received by the Bank during the 2014, 2013 and 2012 taxation years.

The transactions to which the above-mentioned reassessments relate are similar to those prospectively addressed by income tax legislation enacted as a result of the 2015 and 2018 Canadian federal budgets.

The CRA may issue reassessments to the Bank for taxation years subsequent to 2015 in regard to activities similar to those that were the subject of the above-mentioned reassessments. The Bank remains confident that its tax position was appropriate and intends to vigorously defend its position. As a result, no amount has been recognized in the consolidated financial statements as at July 31, 2020.

## Contingent Liabilities

### Maple Financial Group Inc.

The Bank has a 24.9% equity interest in Maple Financial Group Inc. (Maple), a privately owned Canadian company that operated through direct and indirect wholly owned subsidiaries in Canada, Germany, the United Kingdom and the United States.

Maple Bank GmbH (Maple GmbH), an indirect wholly owned subsidiary of Maple, has been the subject of an investigation into alleged tax irregularities by German prosecutors since September 2015, and the investigation was focusing on selected trading activities by Maple GmbH and some of its former employees, primarily during taxation years 2006 to 2010. The German authorities have alleged that these trading activities, often referred to as "cum/ex trading," violated German tax laws. Neither the Bank nor its employees were involved in these trading activities and, to the Bank's knowledge, are not the subject of this investigation. At that time, the Bank announced that if it were determined that portions of the dividends it received from Maple could be reasonably attributed to tax fraud by Maple GmbH, arrangements would be made to repay those amounts to the relevant authority.

On February 6, 2016, the German Federal Financial Supervisory Authority, BaFin, placed a moratorium on the business activities of Maple GmbH preventing it from carrying out its normal business activities. In August 2016, Maple filed for bankruptcy under applicable Canadian laws, and a trustee was appointed to administer the company. Similar proceedings were initiated for each of Maple's other material subsidiaries in their home jurisdictions. In light of the situation, the Bank wrote off the carrying value of its equity interest in Maple in an amount of \$164 million (\$145 million net of income taxes) during the first quarter of 2016. The \$164 million write-off of the equity interest in this associate was recognized in the *Non-interest income – Other* item of the Consolidated Statement of Income for the year ended October 31, 2016 and was reported in the Financial Markets segment.

While there has not yet been a determination of tax fraud on the part of Maple GmbH or its employees, in the insolvency proceedings of Maple GmbH the German finance office issued a declaration about the result of the tax audit at Maple GmbH and about the relevant tax consequences of the cum/ex trading and concluded a final tax claim of the tax authorities against the insolvency administrator. This claim was approved by the Maple GmbH creditor assembly.

The Bank has been in contact with the German prosecutors, who have confirmed that, in their view based upon the evidence they have considered since the occurrence of the insolvency, the Bank was not involved in any respect with the alleged tax fraud undertaken by Maple GmbH nor was it negligent in failing to identify that alleged fraud. Further to discussions between the Bank and the German prosecutors concerning the amounts deemed attributable to the alleged tax fraud, the Bank paid 7.7 million euros to the German tax authorities on November 19, 2019. As at October 31, 2019, an \$11 million provision was recorded to reflect this adjusting event after the Consolidated Balance Sheet date.

In December 2019, the Bank, together with the other principal Maple shareholders, reached an agreement with the bankruptcy and insolvency administrator of Maple GmbH to settle any potential claims that might be asserted against them by or on behalf of Maple GmbH. In connection with the settlement, the Bank agreed to pay 8.7 million euros for the benefit of Maple GmbH's creditors and, during the first quarter of 2020, recorded a \$13 million charge in the *Non-interest expenses – Other* item presented in the *Other* heading of segment results. During the third quarter of 2020, by virtue of the finalization of this agreement, all material liabilities associated with the Bank's ownership of Maple have been resolved.

## Capital Management

Capital management has a dual role of ensuring a competitive return to the Bank's shareholders while maintaining a solid capital foundation that covers risks inherent to the Bank's business, supports its business segments and protects its clients. The Bank's capital management policy defines guiding principles as well as the roles and responsibilities of its internal capital adequacy assessment process. This process aims to determine the capital that the Bank needs to pursue its business activities and accommodate unexpected losses arising from extremely adverse economic and operational conditions. For additional information on the capital management framework, see the Capital Management section on pages 50 to 57 of the Bank's *2019 Annual Report*.

### Basel Accord

During the second quarter of 2020, OSFI adjusted regulatory ratio requirements in response to the impact of the COVID-19 pandemic. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A. The Bank and all other major Canadian banks have to maintain minimum capital ratios established by OSFI: a CET1 capital ratio of at least 9.0%, a Tier 1 capital ratio of at least 10.5%, and a Total capital ratio of at least 12.5%. All of these ratios are to include a capital conservation buffer of 2.5% established by the BCBS and OSFI as well as a 1.0% surcharge applicable solely to D-SIBs and a 1.0% domestic stability buffer established by OSFI. The domestic stability buffer, which can vary from 0% to 2.5% of risk-weighted assets, consists exclusively of CET1 capital. A D-SIB that fails to meet this buffer requirement will not be subject to automatic constraints to reduce capital distributions but will have to provide a remediation plan to OSFI. The banks also have to meet the capital floor that sets the regulatory capital level according to the Basel II standardized approach. If the capital requirement under Basel III is less than 70% of the capital requirement as calculated under Basel II, the difference is added to risk-weighted assets. OSFI requires Canadian banks to meet a Basel III leverage ratio of at least 3.0%. The leverage ratio is a measure independent of risk that is calculated by dividing the amount of Tier 1 capital by total exposure. Total exposure is defined as the sum of on-balance-sheet assets (including derivative exposures and securities financing transaction exposures) and off-balance-sheet items. The assets deducted from Tier 1 capital are also deducted from total exposure.

In addition to those measures, OSFI is requiring that regulatory capital instruments other than common equity have a non-viability contingent capital (NVCC) clause to ensure that investors bear losses before taxpayers should the government determine that it is in the public interest to rescue a non-viable financial institution. Instruments issued before January 1, 2013 that would be Basel III compliant if not for the absence of the NVCC clause are grandfathered and will be phased out over a period of ten years. The Bank expects to phase out all of its remaining non-NVCC instruments without resorting to any regulatory event redemption clause.

OSFI's *Total Loss Absorbing Capacity* (TLAC) guideline, which applies to all D-SIBs under the federal government's bail-in regulations, came into effect on September 23, 2018. The purpose of the TLAC guideline is to ensure that a D-SIB has sufficient loss-absorbing capacity to support its recapitalization in the unlikely event it becomes non-viable. OSFI is requiring D-SIBs to maintain a minimum risk-based TLAC ratio of 22.50% (including the domestic stability buffer) of risk-weighted assets and a minimum TLAC leverage ratio of 6.75% by November 1, 2021. During the fiscal year ended October 31, 2019, the Bank started to issue qualifying bail-in debt and expects its TLAC ratios to improve through the normal refinancing of its maturing unsecured term debt. The Bank does not anticipate any challenges in meeting these TLAC requirements.

### Requirements – Regulatory Ratios Under Basel III

	As at July 31, 2020						
	Minimum	Capital conservation buffer	Minimum set by BCBS	D-SIB surcharge	Minimum set by OSFI <sup>(1)</sup>	Domestic stability buffer <sup>(2)</sup>	Minimum set by OSFI <sup>(1)</sup> , including the buffer
<b>Capital ratios</b>							
CET1	4.5 %	2.5 %	7.0 %	1.0 %	8.0 %	1.0 %	9.0 %
Tier 1	6.0 %	2.5 %	8.5 %	1.0 %	9.5 %	1.0 %	10.5 %
Total	8.0 %	2.5 %	10.5 %	1.0 %	11.5 %	1.0 %	12.5 %
<b>Leverage ratio</b>	3.0 %	n.a.	n.a.	n.a.	3.0 %	n.a.	3.0 %

n.a. Not applicable

(1) The capital ratios include the capital conservation buffer and the D-SIB surcharge.

(2) On March 13, 2020, OSFI lowered the buffer level to 1.0%, effective immediately. On June 23, 2020, OSFI confirmed that the buffer would be maintained at 1.0% until December 2020.

The Bank ensures that its capital levels are always above the minimum regulatory requirements. By maintaining a strong capital structure, the Bank can cover the risks inherent to its business activities, support its business segments, and protect its clients.

Other disclosure requirements pursuant to Pillar 3 of the Basel Accord and a set of recommendations defined by the EDTF are presented in the *Supplementary Regulatory Capital and Pillar 3 Disclosure* report published quarterly and available on the Bank's website at [nbc.ca](http://nbc.ca). Also available on the Bank's website is a complete list of capital instruments and their main features.

## Regulatory Developments

The Bank closely monitors regulatory developments and participates actively in various consultative processes. During the second quarter of 2020, in response to the impact of COVID-19, OSFI announced a series of regulatory adjustments to support the financial and operational resilience of banks. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A. For additional information on the regulatory context on October 31, 2019, see page 53 of the Capital Management section in the *2019 Annual Report*. In addition, since November 1, 2019, the below-described regulatory developments should also be considered.

On November 14, 2019, the BCBS issued a consultative document entitled *Revisions to Market Risk Disclosure Requirements*. This document sets out adjustments to the Pillar 3 templates for the revised market risk framework, i.e., adjustments made to reflect the changes made to the final version of *Revisions to the Minimum Capital Requirements for Market Risk* published in January 2019.

On November 14, 2019, the BCBS issued *Voluntary Disclosure of Sovereign Exposures*, a consultative document seeking views on three potential disclosure templates. The document would require banks to disclose their sovereign exposures and risk-weighted assets according to jurisdiction, currency, and accounting classification. Implementation is mandatory for banks only when so required by the national authority in its territory.

On November 28, 2019, the BCBS issued a consultative document entitled *Credit Valuation Adjustment Risk: Targeted Final Revisions*. This document proposes a set of targeted adjustments to the CVA risk framework issued in December 2017. The adjustments are designed to align the revised CVA risk framework with the standards set out in *Minimum Capital Requirements for Market Risk* and in *Capital Requirements for Bank Exposures to Central Counterparties*. On July 8, 2020, the BCBS issued the final version of the document entitled *Targeted Revisions to the Credit Valuation Adjustment Risk Framework*. This document reflects feedback received from the consultation in December 2019.

## Management Activities

On June 10, 2019, the Bank began a normal course issuer bid to repurchase for cancellation up to 6,000,000 common shares over the 12-month period ending no later than June 9, 2020. During the year ended October 31, 2019, the Bank had repurchased 2,200,000 common shares under this program. During the nine-month period ended July 31, 2020, the Bank repurchased 525,000 common shares for \$30 million, which reduced *Common share capital* by \$5 million and *Retained earnings* by \$25 million. These repurchases were carried out before March 13, 2020, which was the date on which OSFI lowered the domestic stability buffer and indicated that it was expecting all banks to cease any dividend increases or share buybacks. On June 30, 2020, NBC Asset Trust (the Trust), a closed-end trust established by the Bank, redeemed all of the outstanding 350,000 Trust units – Series 2 (NBC CapS II – Series 2) at a per-unit price of \$1,000 for gross proceeds of \$350 million. On July 17, 2020, the Trust was dissolved.

## Shares and Stock Options

	As at July 31, 2020	
	Number of shares	\$ million
First preferred shares		
Series 30	14,000,000	350
Series 32	12,000,000	300
Series 34	16,000,000	400
Series 36	16,000,000	400
Series 38	16,000,000	400
Series 40	12,000,000	300
Series 42	12,000,000	300
	<b>98,000,000</b>	<b>2,450</b>
Common shares	<b>335,665,995</b>	<b>3,040</b>
Stock options	<b>11,779,220</b>	

As at August 21, 2020, there were 335,690,948 common shares and 11,748,670 stock options outstanding. NVCC provisions require the conversion of capital instruments into a variable number of common shares should OSFI deem a bank to be non-viable or should the government publicly announce that a bank has accepted or agreed to accept an injection of capital. If an NVCC trigger event were to occur, all of the Bank's preferred shares and medium-term notes maturing on February 1, 2028, which are NVCC capital instruments, would be converted into common shares of the Bank according to an automatic conversion formula at a conversion price corresponding to the greater of the following amounts: (i) a \$5.00 contractual floor price; or (ii) the market price of the Bank's common shares on the date of the trigger event (10-day weighted average price). Based on a \$5.00 floor price and including an estimate for accrued dividends and interest, these NVCC capital instruments would be converted into a maximum of 724 million Bank common shares, which would have a 68.3% dilutive effect based on the number of Bank common shares outstanding as at July 31, 2020.

## Movement in Regulatory Capital

(millions of Canadian dollars)	Nine months ended July 31, 2020
<b>Common Equity Tier 1 (CET1) capital</b>	
Balance at beginning	9,692
Issuance of common shares (including Stock Option Plan)	85
Impact of shares purchased or sold for trading	–
Repurchase of common shares	(30)

<b>Balance at end</b>	<b>1,046</b>
<b>Total regulatory capital</b>	<b>14,336</b>

(1) This item includes the transitional measure applicable to expected credit loss provisioning implemented during the second quarter of 2020. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A.

(2) This item includes the change in investments in the Bank's CET1 capital.

### Risk-Weighted Assets by Key Risk Drivers

Risk-weighted assets (RWA) amounted to \$94.8 billion as at July 31, 2020 compared to \$83.0 billion as at October 31, 2019, an \$11.8 billion increase resulting mainly from organic growth in RWA, from foreign exchange movements, and from changes to the calculation method resulting from regulatory changes. For credit risk, these changes include the expiry of transitional arrangements for specific wrong-way risk and for the revised securitization framework as well as the adoption of IFRS 16. For market risk, transitional measures were implemented to respond to the volatility caused by the COVID-19 pandemic. The changes in the Bank's risk-weighted assets by risk type are presented in the following table.

### Risk-Weighted Assets Movements by Key Drivers

(millions of Canadian dollars)			Quarter ended			
			July 31, 2020	April 30, 2020	January 31, 2020	October 31, 2019
	Non-counterparty credit risk	Counterparty credit risk	Total	Total	Total	Total
<b>Credit risk – Risk-weighted assets at beginning</b>	<b>69,346</b>	<b>7,311</b>	<b>76,657</b>	70,145	67,254	65,693
Book size	1,290	653	1,943	5,324	1,650	1,979

Model updates	–	–	–	112	(17)	(46)
Methodology and policy	–	–	–	–	1,246	(362)
Acquisitions and disposals	–	–	–	–	–	–
Foreign exchange movements	(700)	(113)	(813)	1,026	89	(21)
<b>Credit risk – Risk-weighted assets at end</b>	<b>70,092</b>	<b>7,852</b>	<b>77,944</b>	76,657	70,145	67,254
<b>Market risk – Risk-weighted assets at beginning</b>			<b>4,121</b>	4,397	4,276	3,972
Movement in risk levels <sup>(1)</sup>			385	1,441	121	304
Model updates			218	–	–	–
Methodology and policy			–	(1,717)	–	–
Acquisitions and disposals			–	–	–	–
<b>Market risk – Risk-weighted assets at end</b>			<b>4,724</b>	4,121	4,397	4,276
<b>Operational risk – Risk-weighted assets at beginning</b>			<b>11,977</b>	11,664	11,509	11,319
Movement in risk levels			169	313	155	190
Acquisitions and disposals			–	–	–	–
<b>Operational risk – Risk-weighted assets at end</b>			<b>12,146</b>	11,977	11,664	11,509
<b>Risk-weighted assets at end</b>			<b>94,814</b>	92,755	86,206	83,039

(1) Also includes foreign exchange rate movements that are not considered material.

The table above provides the risk-weighted assets movements by the key drivers underlying the different risk categories.

The *Book size* item reflects organic changes in book size and composition (including new loans and maturing loans). RWA movements attributable to book size include increases or decreases in exposures, measured by exposure at default, assuming a stable risk profile.

The *Book quality* item is the Bank's best estimate of changes in book quality related to experience, such as underlying customer behaviour or demographics, including changes resulting from model recalibrations or realignments and also including risk mitigation factors.

The *Model updates* item is used to reflect implementations of new models, changes in model scope, and any other change applied to address model malfunctions. During the quarter ended July 31, 2020, the Bank changed its SVaR period to encompass the COVID-19 crisis.

The *Methodology and policy* item presents the impact of changes in calculation methods resulting from changes in regulatory policies as a result, for example, of new regulations. During the quarter ended January 31, 2020, the transitional arrangements for specific wrong-way risk and for the revised securitization framework expired. On November 1, 2019, the Bank had also adopted IFRS 16 and recognized right-of-use assets. During the quarter ended April 30, 2020, OSFI introduced provisional measures for market risk in response to the volatility caused by the COVID-19 pandemic. These measures are still in effect.

### Regulatory Capital Ratios

As at July 31, 2020, the Bank's CET1, Tier 1, and Total capital ratios were, respectively, 11.4%, 14.0% and 15.1%, i.e., above the regulatory requirements, compared to ratios of, respectively, 11.7%, 15.0% and 16.1% as at October 31, 2019. The decrease in the CET1 capital ratio since October 31, 2019 was essentially due to growth in risk-weighted assets. Also contributing to this decrease was the expiry of transitional arrangements for specific wrong-way risk and for the revised securitization framework as well as the adoption of IFRS 16. However, this decrease in the CET1 capital ratio was partly offset by net income net of dividends, the transitional measures applicable to ECL provisioning, common share issuances under the Stock Option Plan, and remeasurements of pension plans and other post-employment benefit plans. The decreases in the Tier 1 capital ratio and the Total capital ratio were essentially due to the same factors as well as to a redemption of trust units issued by NBC Asset Trust. As at July 31, 2020, the leverage ratio was 4.3%, an increase from 4.0% as at October 31, 2019. The increase in the leverage ratio is explained by the growth in Tier 1 capital, due to the same factors as described above, and by modest growth in total exposure, mainly from temporary measures announced by OSFI with respect to the exclusion of exposures from central bank reserves and sovereign-issued securities that qualify as HQLA securities under the *Liquidity Adequacy Requirements* guideline.

### Regulatory Capital and Ratios Under Basel III

(millions of Canadian dollars)	As at July 31, 2020 Adjusted <sup>(1)</sup>	As at July 31, 2020	As at October 31, 2019
<b>Capital</b>			
CET1	10,608	10,840	9,692
Tier 1	13,058	13,290	12,492
Total	14,336	14,336	13,366
<b>Risk-weighted assets</b>	94,814	94,814	83,039
<b>Total exposure</b>	309,001	309,001	308,902
<b>Capital ratios</b>			
CET1	11.2 %	11.4 %	11.7 %
Tier 1	13.8 %	14.0 %	15.0 %
Total	15.1 %	15.1 %	16.1 %
<b>Leverage ratio</b>	4.2 %	4.3 %	4.0 %

(1) The Basel III regulatory capital and ratios adjusted as at July 31, 2020 do not include the transitional measure applicable to expected credit loss provisioning. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A.

### Dividends

On August 25, 2020, the Board of Directors declared regular dividends on the various series of first preferred shares and a dividend of 71 cents per common share, payable on November 1, 2020 to shareholders of record on September 28, 2020.

## Risk Management

Risk-taking is intrinsic to a financial institution's business. The Bank views risk as an integral part of its development and the diversification of its activities. It advocates a risk management approach consistent with its business strategy. The Bank voluntarily exposes itself to certain risk categories, particularly credit and market risk, in order to generate revenue. It assumes certain risks that are inherent to its activities—to which it does not choose to expose itself—and that do not generate revenue, i.e., mainly operational risks.

COVID-19 has affected the general economic environment and financial market conditions in Canada, the United States, and certain other countries where the Bank conducts business. COVID-19 has also put certain risks into perspective. Despite the exceptional nature of this situation, risks are rigorously managed. Consequently, decision-making is supported by risk assessments and management processes that are consistent with the Bank's risk appetite and by prudent levels of capital and liquidity. The purpose of sound and effective risk management is to provide reasonable assurance that incurred risks do not exceed acceptable thresholds, to control the volatility in the Bank's results, and to ensure that risk-taking contributes to the creation of shareholder value. The Bank's governance structure for risk management has remained largely unchanged from that described in the *2019 Annual Report*. In addition, during the quarters ended July 31, 2020 and April 30, 2020, the Bank accelerated and increased the frequency of certain risk management activities.

Despite the exercise of stringent risk management and the mitigation measures in place, risk cannot be suppressed entirely, and residual risks may occasionally cause significant losses. Certain risks are discussed hereafter. For additional information, refer to the section entitled COVID-19 Pandemic – Risk Factors on pages 4 and 5 of this MD&A and to the Risk Management section on pages 58 to 94 of the *2019 Annual Report*. Risk management information is also provided in Note 7 to the consolidated financial statements, which covers loans.

## Credit Risk

Credit risk is the risk of incurring a financial loss if an obligor does not fully honour its contractual commitments to the Bank. Obligors may be debtors, issuers, counterparties or guarantors. Credit risk is the most significant risk facing the Bank in the normal course of business. COVID-19 has had an adverse impact on local and global economies, creating a difficult environment for obligors. It has produced an exceptional environment characterized by major disruptions throughout the market as a whole, including business closures, temporary layoffs, and declining oil prices. However, government measures have been implemented to help individuals and businesses affected by COVID-19.

The amounts shown in the following table represent the Bank's maximum exposure to credit risk as at the financial reporting date without taking into account any collateral held or any other credit enhancements. These amounts do not take into account allowances for credit losses nor amounts pledged as collateral. The table also excludes equity securities.

### Maximum Credit Risk Exposure Under the Basel Asset Categories

(millions of Canadian dollars)						As at July 31, 2020	As at October 31, 2019
	Drawn	Undrawn commitments	Repo-style transactions <sup>(1)</sup>	Derivative financial instruments	Other off-balance- sheet items <sup>(2)</sup>	Total	Total

(1) Securities purchased under reverse repurchase agreements and sold under repurchase agreements as well as securities loaned and borrowed.

(2) Letters of guarantee, documentary letters of credit and securitized assets that represent the Bank's commitment to make payments in the event that a client cannot meet its financial obligations to third parties.

To meet OSFI's mortgage loan disclosure requirements, additional information has been provided in *Supplementary Financial Information – Third Quarter 2020* and in *Supplementary Regulatory Capital and Pillar 3 Disclosure – Third Quarter 2020*, which are available on the Bank's website at [nbc.ca](http://nbc.ca).

## Market Risk

Market risk is the risk of losses arising from movements in market prices. The Bank is exposed to market risk through its participation in trading, investment and asset/liability management activities. Given the impact of COVID-19 on local and global economies, the Bank is operating in a challenging and volatile environment. It is an exceptional situation that has led to major disruptions throughout the market as a whole, including low interest rates, stock market downturns, and declines in oil prices.

The following tables provide a breakdown of the Bank's Consolidated Balance Sheet into financial assets and liabilities by those that carry market risk and those that do not carry market risk, distinguishing between trading positions whose main risk measures are Value-at-Risk (VaR) and stressed VaR (SVaR) and non-trading positions that use other risk measures.

### Reconciliation of Market Risk With Consolidated Balance Sheet Items

(millions of Canadian dollars)		As at July 31, 2020

<b>Total trading SVaR</b>	<b>(10.7)</b>	<b>(27.2)</b>	<b>(19.0)</b>	<b>(19.6)</b>	<b>(18.6)</b>	<b>(24.1)</b>	<b>(12.6)</b>	<b>(12.8)</b>	<b>(18.0)</b>	<b>(12.3)</b>

n.m. Computation of a correlation effect for the high and low is not meaningful, as highs and lows may occur on different days and be attributable to different types of risk.

(1) Amounts are presented on a pre-tax basis and represent one-day SVaR using a 99% confidence level.

(2) The total trading SVaR is less than the sum of the individual risk factor SVaR results due to the correlation effect.

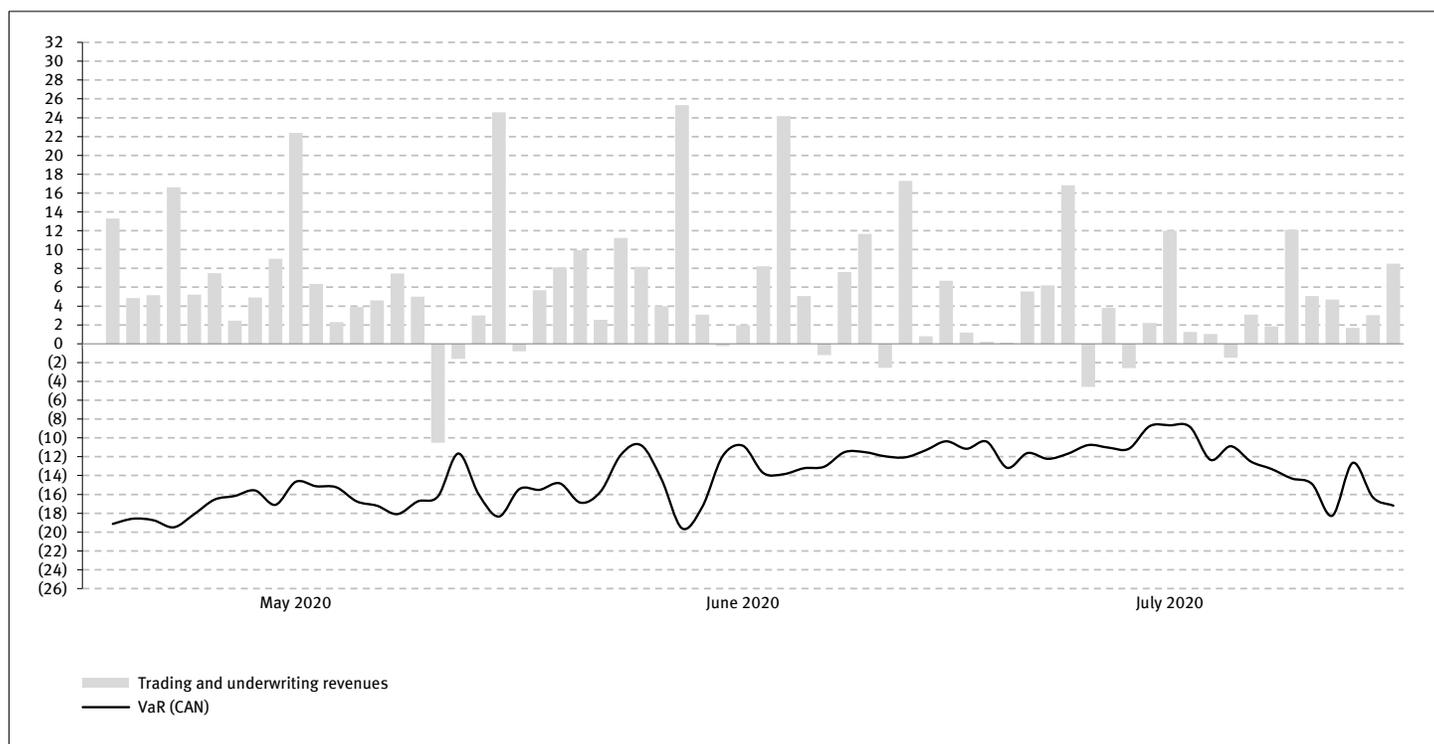

The average total trading VaR increased from \$9.5 million to \$14.2 million between the second quarter of 2020 and the third quarter of 2020. Starting halfway through the second quarter, new tail scenarios were added to the two-year VaR history window due to increased market volatility related to the COVID-19 crisis. These tail scenarios now affect the entire quarter, creating a higher average total trading VaR. While the Bank changed the SVaR simulation period to encompass the COVID-19 crisis, the average total trading SVaR remained stable during the third quarter of 2020 compared to the second quarter of 2020.

### Daily Trading and Underwriting Revenues

The following table shows daily trading and underwriting revenues as well as VaR. During the quarter ended July 31, 2020, daily trading and underwriting revenues were positive 86% of the days. Seven trading days were marked by daily trading and underwriting net losses of more than \$1 million. None of the losses exceeded the VaR.

### Quarter Ended July 31, 2020

(millions of Canadian dollars)

### Interest Rate Sensitivity – Non-Trading Activities (Before Tax)

The following tables present the potential before-tax impact of an immediate and sustained 100-basis-point increase or of an immediate and sustained 25-basis-point decrease in interest rates on the economic value of equity and on the net interest income of the Bank's non-trading portfolios for the next 12 months, assuming no further hedging is undertaken. In the current environment of very low interest rates, we believe that a sensitivity analysis reflecting an immediate and sustained 25-basis-point decrease in interest rates provides more relevant information.

(millions of Canadian dollars)	As at July 31, 2020			As at October 31, 2019		
	Canadian dollar	Other currencies	Total	Canadian dollar	Other currencies	Total
<b>Impact on equity</b>						
100-basis-point increase in the interest rate	(208)	12	(196)	(178)	40	(138)
25-basis-point decrease in the interest rate	36	(3)	33	54	(1)	53
<b>Impact on net interest income</b>						
100-basis-point increase in the interest rate	(22)	14	(8)	(26)	42	16
25-basis-point decrease in the interest rate	2	(4)	(2)	19	(2)	17

## Liquidity and Funding Risk

Liquidity and funding risk are the risks that the Bank will be unable to honour daily cash and financial obligations without resorting to costly and untimely measures. Liquidity and funding risk arises when sources of funds become insufficient to meet scheduled payments under the Bank's commitments.

Liquidity risk stems from mismatched cash flows related to assets and liabilities as well as from the characteristics of certain products such as credit commitments and non-fixed-term deposits.

Funding risk is defined as the risk to the Bank's ongoing ability to raise sufficient funds to finance actual or proposed business activities on an unsecured or secured basis at an acceptable price. The funding management priority is to achieve an optimal balance between deposits, securitization, secured funding and unsecured funding. This brings optimal stability to the funding and reduces vulnerability to unpredictable events.

COVID-19 has affected overall economic and market conditions. The Bank is facing a challenging and volatile environment, but its sound liquidity and funding management is helping it to maintain an optimal balance between its sources of cash and anticipated payments.

### Regulatory Developments

On March 27, 2020, OSFI took exceptional measures in response to the operational issues caused by the spread of COVID-19. OSFI expects banks to use the unencumbered HQLA assets they hold within the liquidity coverage ratio (LCR) as a defense against both a potential liquidity crisis and an actual liquidity crisis. OSFI is also providing guidance on how to treat the new government facilities when calculating regulatory liquidity ratios. In addition, the Bank of Canada has taken more elaborate measures to ensure that the financial system continues to play its role by granting credit to those who need it. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A.

On April 9, 2020, OSFI issued a news release announcing regulatory flexibility measures to support COVID-19 efforts. The news release mentions that implementations of changes to specific regulatory returns would be delayed to help limit the impact on institutions while ensuring that important data will continue to be collected.

The Bank continues to closely monitor regulatory developments and participates actively in various consultative processes. For additional information on the regulatory context as at October 31, 2019, see page 82 of the Risk Management section in the *2019 Annual Report*.

### Liquidity Management

#### Liquid Assets

To protect depositors and creditors from unexpected crisis situations, the Bank holds a portfolio of unencumbered liquid assets that can be readily liquidated to meet financial obligations. The majority of unencumbered liquid assets are held in Canadian dollars. Moreover, all assets that can be quickly monetized are considered liquid assets. The following tables provide information on the Bank's encumbered and unencumbered assets.

## Liquid Asset Portfolio

(millions of Canadian dollars)	As at July 31, 2020					As at October 31, 2019
	Bank-owned liquid assets <sup>(1)</sup>	Liquid assets received <sup>(2)</sup>	Total liquid assets	Encumbered liquid assets <sup>(3)</sup>	Unencumbered liquid assets	Unencumbered liquid assets

(1) Bank-owned liquid assets include assets for which there are no legal or geographic restrictions.

(2) Securities received as collateral with respect to securities financing and derivative transactions and securities purchased under reverse repurchase agreements and securities borrowed.

(3) In the normal course of its funding activities, the Bank pledges assets as collateral in accordance with standard terms. Encumbered liquid assets include assets used to cover short sales, obligations related to securities sold under repurchase agreements and securities loaned, guarantees related to security-backed loans and borrowings, collateral related to derivative financial instrument transactions, asset-backed securities and liquid assets legally restricted from transfers.

(4) The average is based on the sum of the end-of-period balances of the three months of the quarter divided by three.

## Summary of Encumbered and Unencumbered Assets

(millions of Canadian dollars)	As at July 31, 2020					
	Encumbered assets <sup>(1)</sup>		Unencumbered assets		Encumbered assets as a % of total assets	
	Pledged as collateral	Other <sup>(2)</sup>	Available as collateral	Other <sup>(3)</sup>		
Cash and deposits with financial institutions	300	5,273	23,505	–	29,078	1.7
Securities	36,730	–	60,882	–	97,612	11.4

	<b>56,928</b>	<b>16,809</b>	<b>74,671</b>	<b>133,050</b>	<b>281,458</b>	<b>26.2</b>

- (1) In the normal course of its funding activities, the Bank pledges assets as collateral in accordance with standard terms. Encumbered assets include assets used to cover short sales, obligations related to securities sold under repurchase agreements and securities loaned, guarantees related to security-backed loans and borrowings, collateral related to derivative financial instrument transactions, asset-backed securities, residential mortgage loans securitized and transferred under the Canada Mortgage Bond program, assets held in consolidated trusts supporting the Bank's funding activities and mortgage loans transferred under the covered bond program.
- (2) Other encumbered assets include assets for which there are restrictions and that cannot therefore be used for collateral or funding purposes as well as assets used to cover short sales.
- (3) Other unencumbered assets are assets that cannot be used for collateral or funding purposes in their current form. This category includes assets that are potentially eligible as funding program collateral (e.g., mortgages insured by the Canada Mortgage and Housing Corporation that can be securitized into mortgage-backed securities under the *National Housing Act* (Canada)).

### Liquidity Coverage Ratio (LCR)

The LCR was introduced primarily to ensure that banks could withstand periods of severe short-term stress. OSFI has been requiring Canadian banks to maintain a minimum LCR of 100%. An LCR above 100% ensures that banks are holding sufficient high-quality liquid assets (HQLA) to cover net cash outflows given a severe, 30-day liquidity crisis. The assumptions underlying the LCR scenario were established by the BCBS and OSFI.

The following table provides average LCR data calculated using the daily figures in the quarter. For the quarter ended July 31, 2020, the Bank's average LCR was 161%, well above the 100% regulatory requirement and demonstrating the Bank's solid liquidity position.

### LCR Disclosure Requirements<sup>(1)</sup>

(millions of Canadian dollars)

	For the quarter ended		
		July 31, 2020	April 30, 2020
	Total unweighted value <sup>(2)</sup> (average)	Total weighted value <sup>(3)</sup> (average)	Total weighted value <sup>(3)</sup> (average)
<b>High-quality liquid assets (HQLA)</b>			
1 Total HQLA	n.a.	65,250	50,642
<b>Cash outflows</b>			
2 Retail deposits and deposits from small business customers, of which:	51,699	4,274	4,010
3 Stable deposits	25,488	765	671
4 Less stable deposits	26,211	3,509	3,339
5 Unsecured wholesale funding, of which:	87,829	48,995	43,962

7 Non-operational deposits (all counterparties)	63,365	36,370	32,008
8 Unsecured debt	8,869	8,869	8,509
9 Secured wholesale funding	n.a.	13,500	14,344
10 Additional requirements, of which:	41,227	11,881	11,973
11 Outflows related to derivative exposures and other collateral requirements	12,610	6,391	6,496
12 Outflows related to loss of funding on secured debt securities	1,258	1,258	1,345
13 Backstop liquidity and credit enhancement facilities and commitments to extend credit	27,359	4,232	4,132
14 Other contractual commitments to extend credit	2,731	925	840
15 Other contingent commitments to extend credit	89,981	1,584	1,540
16 Total cash outflows	n.a.	81,159	76,669
<b>Cash inflows</b>			
17 Secured lending (e.g., reverse repos)	116,307	18,082	16,521
18 Inflows from fully performing exposures	11,993	7,766	7,015
19 Other cash inflows	14,190	14,190	18,893
20 Total cash inflows	142,490	40,038	42,429
		Total adjusted value <sup>(4)</sup>	Total adjusted value <sup>(4)</sup>
21 Total HQLA	n.a.	65,250	50,642
22 Total net cash outflows	n.a.	41,121	34,240
23 Liquidity coverage ratio (%) <sup>(5)</sup>	n.a.	161 %	149 %

n.a. Not applicable

(1) OSFI prescribed a table format in order to standardize disclosure throughout the banking industry.

(2) Unweighted values are calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

(3) Weighted values are calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates.

(4) Total adjusted values are calculated after the application of both haircuts and inflow and outflow rates and any applicable caps.

(5) The data in this table is calculated using averages of the daily figures in the quarter.

As at July 31, 2020, Level 1 liquid assets represented 82% of the Bank's HQLA, which includes cash, central bank deposits, and bonds issued or guaranteed by the Canadian government and Canadian provincial governments.

Cash outflows arise from the application of OSFI-prescribed assumptions on deposits, debt, secured funding, commitments and additional collateral requirements. The cash outflows are partly offset by cash inflows, which come mainly from secured loans and performing loans. The Bank expects some quarter-over-quarter variation between reported LCRs, and such variation may not be indicative of a trend. The variation between the quarter ended July 31, 2020 and the preceding quarter reflects exceptional measures taken by OSFI and the Bank of Canada in response to the operational issues caused by the spread of COVID-19. The Bank's liquid asset buffer is well in excess of its total net cash outflows.

The LCR assumptions differ from the assumptions used for the liquidity disclosures provided in the tables on the preceding pages or those used for internal liquidity management rules. While the liquidity disclosure framework is prescribed by the EDTF, the Bank's internal liquidity metrics use assumptions that are calibrated according to its business model and experience.

## Funding

The Bank continuously monitors and analyzes the possibilities for accessing less expensive and more flexible funding. The deposit strategy remains a priority for the Bank, which continues to prefer deposits to institutional funding. The table below presents the residual contractual maturities of the Bank's wholesale funding. The information has been presented in accordance with the categories recommended by the EDTF for comparison purposes with other banks.

### Residual Contractual Maturities of Wholesale Funding<sup>(1)</sup>

(millions of Canadian dollars)	As at July 31, 2020							
	1 month or less	Over 1 month to 3 months	Over 3 months to 6 months	Over 6 months to 12 months	Subtotal 1 year or less	Over 1 year to 2 years	Over 2 years	Total

Unsecured funding	3,909	2,687	2,424	1,721	10,741	2,304	9,992	23,037
	<b>3,909</b>	<b>3,116</b>	<b>4,536</b>	<b>5,344</b>	<b>16,905</b>	<b>9,310</b>	<b>28,839</b>	<b>55,054</b>
As at October 31, 2019	3,187	6,098	7,217	6,925	23,427	9,362	30,746	63,535

- (1) Bankers' acceptances are not included in this table.
- (2) Deposits from banks include all non-negotiable term deposits from banks.
- (3) Includes bearer deposit notes.
- (4) Certificates of deposit denominated in euros are included in senior unsecured medium-term notes.
- (5) Includes deposits subject to bank recapitalization (bail-in) conversion regulations.
- (6) Subordinated debt is presented in this table but the Bank does not consider it as part of its wholesale funding.

As part of a comprehensive liquidity management framework, the Bank regularly reviews its contracts that stipulate that additional collateral could be required in the event of a downgrade of the Bank's credit rating. The Bank's liquidity position management approach already incorporates additional collateral requirements in the event of a one-notch to three-notch downgrade. The table below presents the additional collateral requirements in the event of a one-notch or three-notch credit rating downgrade.

(millions of Canadian dollars)	As at July 31, 2020	
	One-notch downgrade	Three-notch downgrade
Derivatives <sup>(1)</sup>	25	38

- (1) Contractual requirements related to agreements known as Credit Support Annexes.

### Residual Contractual Maturities of Balance Sheet Items and Off-Balance-Sheet Commitments

The following tables present balance sheet items and off-balance-sheet commitments by residual contractual maturity as at July 31, 2020 with comparative figures as at October 31, 2019. The information gathered from this maturity analysis is a component of liquidity and funding management. However, this maturity profile does not represent how the Bank manages its interest rate risk or its liquidity risk and funding needs. The Bank considers factors other than contractual maturity in the assessment of liquid assets or in determining expected future cash flows.

In the normal course of business, the Bank enters into various off-balance-sheet commitments. The credit instruments used to meet the financing needs of its clients represent the maximum amount of additional credit the Bank could be obligated to extend if the commitments were fully drawn.

The Bank also has future minimum commitments under leases as well as for other contracts, mainly commitments to purchase loans and contracts for outsourced information technology services. Most of the lease commitments are related to operating leases.

(millions of Canadian dollars)										As at July 31, 2020	
	1 month or less	Over 1 month to 3 months	Over 3 months to 6 months	Over 6 months to 9 months	Over 9 months to 12 months	Over 1 year to 2 years	Over 2 years to 5 years	Over 5 years	No specified maturity	Total

## Risk Disclosures

One of the purposes of the *2019 Annual Report*, the *Report to Shareholders – Third Quarter 2020*, and the related supplementary information documents is to provide transparent, high-quality risk disclosures in accordance with the recommendations made by the Financial Stability Board's EDTF group. The following table lists the references where users can find information that responds to the EDTF's 32 recommendations.

		2019 Annual Report	Report to Shareholders <sup>(1)</sup>	Pages Supplementary Regulatory Capital and Pillar 3 Disclosure <sup>(1)</sup>

## Accounting Policies and Financial Disclosure

### Accounting Policies and Critical Accounting Estimates

The Bank's consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). The financial statements also comply with section 308(4) of the *Bank Act* (Canada), which states that, except as otherwise specified by the Office of the Superintendent of Financial Institutions (Canada) (OSFI), the consolidated financial statements are to be prepared in accordance with IFRS. IFRS represent Canadian generally accepted accounting principles (GAAP). None of the OSFI accounting requirements are exceptions to IFRS. The unaudited interim condensed consolidated financial statements for the quarter and the nine-month period ended July 31, 2020 were prepared in accordance with IAS 34 – *Interim Financial Reporting* and using the same accounting policies described in Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2019, except for the changes described in Note 2 to the interim condensed consolidated financial statements, which have been applied since November 1, 2019 following the Bank's adoption of IFRS 16 – *Leases* as well as the early adoption of the amendments to IFRS 7 and IAS 39 arising from the first phase of the interest rate benchmark reform project.

In preparing consolidated financial statements in accordance with IFRS, management must exercise judgment and make estimates and assumptions that affect the reporting date carrying amounts of assets and liabilities, net income and related information. Some accounting policies are considered critical given their importance to the presentation of the Bank's financial position and operating results and require difficult, subjective and complex judgments and estimates on matters that are inherently uncertain. Any change in these judgments and estimates could have a significant impact on the Bank's consolidated financial statements. The critical accounting estimates are the same as those described on pages 95 to 100 of the *2019 Annual Report*.

#### COVID-19 Pandemic Considerations

Some of the Bank's accounting policies require subjective and complex judgments and estimates, as they relate to matters that are inherently uncertain. See Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2019 for a summary of the most significant estimation processes used to prepare the consolidated financial statements in accordance with IFRS and for the measurement techniques used to determine carrying values and fair values of assets and liabilities.

On March 11, 2020, COVID-19 was declared a global pandemic by the World Health Organization. As a result of the heightened uncertainty associated with the unprecedented nature of the COVID-19 pandemic, developing reliable estimates and applying judgment has become even more challenging. ECL accounting has become particularly difficult in the current circumstances and requires significant judgment. The ECL model is forward looking and is based on a probability-weighted approach. Measurement of ECLs at each reporting period reflects reasonable and supportable information about past events, current conditions, and forecasts of future events and economic conditions. During this period of greater economic uncertainty, it is very difficult to forecast future events and the macroeconomic inputs used in ECL modelling. Determining macroeconomic scenarios and assigning probabilities to these scenarios requires significant judgment. Consideration is given both to the effects of COVID-19 and the significant government support measures. The Bank applies expert credit judgment to adjust modelled ECL results when it becomes evident that known or expected risk factors and information were not considered in the credit rating and modelling process. As a result of COVID-19 and the recent economic downturn, significant measurement uncertainty exists in determining ECLs, and measurement is subject to significant judgment. The uncertainty regarding key inputs used in measuring ECLs is outlined in Note 7 to these consolidated financial statements.

In response to the economic impact of COVID-19, the Canadian government has established, among other financial relief programs, the Canada Emergency Business Account (CEBA) program to provide interest-free loans of up to \$40,000 for small and medium-sized businesses and non-profit organizations. The Bank and several other financial institutions are authorized to implement the CEBA program in cooperation with Export Development Canada. This program is guaranteed by the Government of Canada and aims to help businesses cope with the economic challenges resulting from the COVID-19 crisis. Loans made by the Bank to its business clients under CEBA are not recognized on the Bank's Consolidated Balance Sheet, since the conditions of a qualifying pass-through arrangement have been met and the Bank has determined that substantially all the risks and rewards of ownership of the loans have been transferred to the Canadian government. The Bank receives an administration fee as reimbursement for the costs of administering this Canadian government program and this fee is recognized in the Consolidated Statement of Income as a reduction of *Non-interest expenses – Other*.

## Future Accounting Policy Changes

The Bank closely monitors both new accounting standards and amendments to existing accounting standards issued by the IASB. The following standards have been issued but are not yet effective. The Bank is currently assessing the impact of the application of these standards on the consolidated financial statements.

### Effective Date – November 1, 2020

#### *Conceptual Framework for Financial Reporting*

On March 29, 2018, the IASB published *Conceptual Framework for Financial Reporting* to replace its 2010 conceptual framework. For the IASB, the revised conceptual framework has been in effect since its publication date.

### Effective Date – November 1, 2023

#### *IFRS 17 – Insurance Contracts*

In May 2017, the IASB issued IFRS 17 – *Insurance Contracts*, a new standard that replaces IFRS 4, the current insurance contract accounting standard. IFRS 17 introduces a new accounting framework that will improve the comparability and quality of financial information. It provides guidance on the recognition, measurement, presentation and disclosure of insurance contracts. In June 2020, amendments to IFRS 17 were issued and included a two-year deferral of the effective date along with other changes aimed at addressing concerns and implementation challenges identified after IFRS 17 was published in 2017. IFRS 17, as amended, is effective retrospectively for annual periods beginning on or after January 1, 2023, with earlier application permitted. If full retrospective application to a group of insurance contracts is impractical, the modified retrospective approach or the fair value approach may be used.

## Financial Disclosure

During the third quarter of 2020, no changes were made to the policies, procedures and other processes that comprise the Bank's internal control over financial reporting that had or could reasonably have a significant impact on the internal control over financial reporting.

### Note 1 – Basis of Presentation

On August 25, 2020, the Board of Directors authorized the publication of the Bank's unaudited interim condensed consolidated financial statements (the consolidated financial statements) for the quarter and nine-month period ended July 31, 2020.

The Bank's consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB). The financial statements also comply with section 308(4) of the *Bank Act* (Canada), which states that, except as otherwise specified by the Office of the Superintendent of Financial Institutions (Canada) (OSFI), the consolidated financial statements are to be prepared in accordance with IFRS. IFRS represent Canadian generally accepted accounting principles (GAAP). None of the OSFI accounting requirements are exceptions to IFRS.

These consolidated financial statements were prepared in accordance with IAS 34 – *Interim Financial Reporting* and using the same accounting policies as those described in Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2019, except for the changes described in Note 2 to these consolidated financial statements, which have been applied since November 1, 2019 following the Bank's adoption of IFRS 16 – *Leases* as well as its early adoption of amendments to IFRS 7 and IAS 39 arising from the first phase of the interest rate benchmark reform project.

As permitted by the transitional provisions of IFRS 16, the Bank elected to apply IFRS 16 using the modified retrospective basis, with no restatement of comparative periods. Note 2 to these consolidated financial statements presents the impacts of IFRS 16 adoption on the Bank's Consolidated Balance Sheet as at November 1, 2019 and additional information on adoption of IFRS 16. Since interim consolidated financial statements do not include all the annual financial statement disclosures required under IFRS, they should be read in conjunction with the audited annual consolidated financial statements and accompanying notes for the year ended October 31, 2019.

During the quarter ended July 31, 2020, the Bank modified the presentation of the Consolidated Statement of Income by adding a subtotal *Income before provisions for credit losses and income taxes*. Following this change, the *Provisions for credit losses* item was moved below this new subtotal and the comparative figures for the quarter and nine-month period ended July 31, 2019 were adjusted accordingly.

Unless otherwise indicated, all amounts are expressed in Canadian dollars, which is the Bank's functional and presentation currency.

#### COVID-19 Pandemic Considerations

Some of the Bank's accounting policies require subjective and complex judgments and estimates, as they relate to matters that are inherently uncertain. See Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2019 for a summary of the most significant estimation processes used to prepare the consolidated financial statements in accordance with IFRS and for the measurement techniques used to determine carrying values and fair values of assets and liabilities.

## Note 1 – Basis of Presentation (cont.)

On March 11, 2020, COVID-19 was declared a global pandemic by the World Health Organization. As a result of the heightened uncertainty associated with the unprecedented nature of the COVID-19 pandemic, developing reliable estimates and applying judgment has become even more challenging. ECL accounting has become particularly difficult in the current circumstances and requires significant judgment. The ECL model is forward-looking and is based on a probability-weighted approach. Measurement of ECLs at each reporting period reflects reasonable and supportable information about past events, current conditions, and forecasts of future events and economic conditions. During this period of greater economic uncertainty, it is very difficult to forecast future events and the macroeconomic inputs used in ECL modelling. Determining macroeconomic scenarios and assigning probabilities to these scenarios requires significant judgment. Consideration is given both to the effects of COVID-19 and the significant government support measures. The Bank applies expert credit judgment to adjust modelled ECL results when it becomes evident that known or expected risk factors and information were not considered in the credit rating and modelling process. As a result of COVID-19 and the recent economic downturn, significant measurement uncertainty exists in determining ECLs, and measurement is subject to significant judgment. The uncertainty regarding key inputs used in measuring ECLs is outlined in Note 7 to these consolidated financial statements.

In response to the economic impact of COVID-19, the Canadian government has established, among other financial relief programs, the Canada Emergency Business Account (CEBA) program to provide interest-free loans of up to \$40,000 for small and medium-sized businesses and non-profit organizations. The Bank and several other financial institutions are authorized to implement the CEBA program in cooperation with Export Development Canada. This program is guaranteed by the Government of Canada and aims to help businesses cope with the economic challenges resulting from the COVID-19 crisis. Loans made by the Bank to its business clients under CEBA are not recognized on the Bank's Consolidated Balance Sheet, since the conditions of a qualifying pass-through arrangement have been met and the Bank has determined that substantially all the risks and rewards of ownership of the loans have been transferred to the Canadian government. The Bank receives an administration fee as reimbursement for the costs of administering this Canadian government program and this fee is recognized in the Consolidated Statement of Income as a reduction of *Non-interest expenses – Other*.

## Note 2 – Accounting Policy Changes

The Bank adopted the following new and amended standards on November 1, 2019.

### IFRS 16 – Leases

IFRS 16 introduces a single on-balance-sheet accounting model for lessees. As for lessors, IFRS 16 substantially carries forward the lessor accounting in the previous accounting standard, with the distinction between operating leases and finance leases being retained. Changes in accounting policies resulting from the adoption of IFRS 16 on November 1, 2019 are described hereafter.

At the inception date of a contract, the Bank assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. When the Bank is a lessee, it recognizes a right-of-use asset and a corresponding lease liability at the lease commencement date except for short-term leases (defined as leases with terms of 12 months or less) other than real estate leases and leases for which the underlying asset is of low value. For such leases, the Bank recognizes the lease payments as a non-interest expense on a straight-line basis over the lease term. As a practical expedient, the Bank elected for real estate leases not to separate non-lease components from lease components and instead account for them as a single lease component.

#### Right-of-Use Assets

Right-of-use assets are initially measured at cost, and subsequently measured at cost less accumulated depreciation and impairment losses, and adjusted for certain remeasurements of lease liabilities. The cost of a right-of-use asset comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the commencement date, any initial direct costs incurred when entering into the lease, and an estimate of costs to dismantle the asset or restore the site, less any lease incentives received. Right-of-use assets are depreciated over the lesser of the lease term and the useful life of the asset.

Right-of-use assets are presented in *Premises and equipment* on the Consolidated Balance Sheet. The depreciation expense and impairment losses, if any, are recorded in *Non-interest expenses* in the Consolidated Statement of Income.

### Lease Liabilities

The lease liability is initially measured at the present value of future lease payments net of lease incentives not yet received. The present value of lease payments is determined using the Bank's incremental borrowing rate. The lease liability is subsequently measured at amortized cost using the effective interest method. In determining the lease term, the Bank considers all the facts and circumstances that create an economic incentive to exercise an extension option or not to exercise a termination option. The lease term determined by the Bank comprises the non-cancellable period of lease contracts, the periods covered by an option to extend the lease if the Bank is reasonably certain to exercise that option, and the periods covered by an option to terminate the lease if the Bank is reasonably certain not to exercise that option. The Bank reassesses the lease term if a significant event or change in circumstances occurs and that is within its control. The Bank applies judgment to determine the lease term when the lease includes extension and termination options.

Lease liabilities are presented in *Other liabilities* on the Consolidated Balance Sheet, and the interest expense is presented in the *Interest expense – Other* item of the Consolidated Statement of Income.

### Impact of IFRS 16 Adoption

On November 1, 2019, the Bank adopted IFRS 16. As a result, the Bank recognized right-of-use assets of \$648 million (\$668 million reduced by provisions for onerous lease contracts of \$20 million previously recorded in *Other liabilities – Other items* as at October 31, 2019) and lease liabilities of \$668 million.

On transition, for leases previously classified as operating leases, lease liabilities were measured at the present value of the remaining lease payments and discounted using the Bank's incremental borrowing rate as at November 1, 2019. The Bank's weighted average incremental borrowing rate on the total lease liability as at November 1, 2019 was 2.77%. Right-of-use assets were measured at an amount equal to the lease liability and reduced by the amount of the provisions for onerous contracts recorded as at October 31, 2019.

The Bank used the following practical expedients when applying IFRS 16 to leases previously classified as operating leases. The Bank:

- excluded initial direct costs from the measurement of the right-of-use assets at the date of initial application;
- relied on previous assessments of whether or not a lease is an onerous contract;
- did not separate lease components and non-lease components and treated them as a single lease component;
- applied the recognition exemption to leases for which the lease term ends within 12 months of the transition date and to leases for which the underlying asset is of low value; and
- elected not to apply IFRS 16 to leases of intangible assets.

The following table presents a reconciliation of the Bank's operating lease commitments as at October 31, 2019 to the lease liabilities recognized as at November 1, 2019.

Operating lease commitments as at October 31, 2019	691
Extension and termination options reasonably certain to be exercised	70
Impact of discounting using the Bank's incremental borrowing rate as at November 1, 2019	(93)
<b>Lease liabilities recognized as at November 1, 2019</b>	<b>668</b>

As at July 31, 2020, the amount of the right-of-use assets presented in *Premises and equipment* was \$611 million and the amount of lease liabilities presented in *Other liabilities* was \$638 million. For the quarter ended July 31, 2020, the Bank recognized a \$25 million depreciation expense on right-of-use assets in *Non-interest expenses – Occupancy* (\$74 million for the nine-month period ended July 31, 2020) and a \$4 million interest expense on lease liabilities in *Interest expense – Other* (\$13 million for the nine-month period ended July 31, 2020).

## Note 2 – Accounting Policy Changes (cont.)

### Interest Rate Benchmark Reform

#### Phase 1

In September 2019, in response to uncertainty arising from the phasing-out of benchmark interest rates such as interbank offered rates (IBORs), the IASB issued amendments to its new and former financial instrument standards, IFRS 9 – *Financial Instruments* and IAS 39 – *Financial Instruments: Recognition and Measurement* as well as to the related standard on disclosures, IFRS 7 – *Financial Instruments: Disclosure*. On November 1, 2019, the Bank early adopted the amendments to IFRS 7 and IAS 39. When the Bank had adopted IFRS 9 on November 1, 2017, it had made an accounting policy choice to continue applying the IAS 39 hedge accounting requirements.

The amendments to IAS 39 provide temporary relief from applying specific hedge accounting requirements to all hedging relationships directly affected by interest rate benchmark reform. A hedging relationship is affected by interest rate benchmark reform if the reform gives rise to uncertainties about (a) the interest rate benchmark (contractually or non-contractually specified) designated as a hedged risk; and/or (b) the timing or the amount of interest rate benchmark-based cash flows of the hedged item or of the hedging instrument. The amendments modify specific hedge accounting requirements so that entities would apply those hedge accounting requirements assuming that the interest rate benchmark is not altered as a result of the interest rate benchmark reform, thereby allowing hedge accounting to continue during the period of uncertainty prior to the transition to alternative benchmark rates. Mandatory application of the amendments ends at the earlier of the following: when the uncertainty arising from interest rate benchmark reform is no longer present and when the hedging relationship is discontinued.

For the Bank, the effective date of these amendments is November 1, 2020. However, early adoption is permitted. For additional information, see Note 17 to the audited annual consolidated financial statements for the year ended October 31, 2019.

#### Phase 2

In April 2020, the IASB issued an exposure draft related to the second phase of the interest rate benchmark reform project, which addresses issues that might affect financial reporting once existing benchmark rates are replaced with alternative benchmark rates. The exposure draft sets out proposals for amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 – *Insurance Contracts* and IFRS 16. The exposure draft proposes amendments to the following areas: modifications of financial assets, financial liabilities and lease liabilities, hedge accounting, and disclosures.

The effective date for the amendments will be annual periods beginning on or after January 1, 2021, with early application permitted. The IASB plans to issue final amendments in August 2020.

## Note 3 – Future Accounting Policy Changes

The Bank closely monitors both new accounting standards and amendments to existing accounting standards issued by the IASB. The following standards have been issued but are not yet effective. The Bank is currently assessing the impact of the application of these standards on the consolidated financial statements.

### Effective Date – November 1, 2020

#### *Conceptual Framework for Financial Reporting*

On March 29, 2018, the IASB published *Conceptual Framework for Financial Reporting* to replace its 2010 conceptual framework. For the IASB, the revised conceptual framework has been in effect since its publication date.

### Effective Date – November 1, 2023

#### *IFRS 17 – Insurance Contracts*

In May 2017, the IASB issued IFRS 17 – *Insurance Contracts*, a new standard that replaces IFRS 4, the current insurance contract accounting standard. IFRS 17 introduces a new accounting framework that will improve the comparability and quality of financial information. IFRS 17 provides guidance on the recognition, measurement, presentation and disclosure of insurance contracts. In June 2020, amendments to IFRS 17 were issued and included a two-year deferral of the effective date along with other changes aimed at addressing concerns and implementation challenges identified after IFRS 17 was published in 2017. IFRS 17, as amended, is effective retrospectively for annual periods beginning on or after January 1, 2023, with earlier application permitted. If full retrospective application to a group of insurance contracts is impractical, the modified retrospective approach or the fair value approach may be used.

## Note 4 – Fair Value of Financial Instruments

### Fair Value and Carrying Value of Financial Instruments by Category

Financial assets and financial liabilities are recognized on the Consolidated Balance Sheet at fair value or at amortized cost in accordance with the categories set out in the accounting framework for financial instruments.

							As at July 31, 2020	
	Carrying value and fair value				Carrying value	Fair value	Total carrying value	Total fair value
	Financial instruments classified as at fair value through profit or loss	Financial instruments designated at fair value through profit or loss	Debt securities classified as at fair value through other comprehensive income	Equity securities designated at fair value through other comprehensive income	Financial instruments at amortized cost, net	Financial instruments at amortized cost, net		
<b>Financial assets</b>								
<b>Cash and deposits with financial institutions</b>	–	–	–	–	29,078	29,078	29,078	29,078
<b>Securities</b>	69,678	3,142	13,110	607	11,075	11,305	97,612	97,842
<b>Securities purchased under reverse repurchase agreements and securities borrowed</b>	–	–	–	–	12,711	12,711	12,711	12,711
<b>Loans and acceptances, net of allowances</b>	7,726	–	–	–	154,027	156,957	161,753	164,683
<b>Other</b>

(1) Includes embedded derivative financial instruments.

## Establishing Fair Value

The fair value of a financial instrument is the price that would be received to sell a financial asset or paid to transfer a financial liability in an orderly transaction in the principal market at the measurement date under current market conditions (i.e., an exit price).

Unadjusted quoted prices in active markets provide the best evidence of fair value. When there is no quoted price in an active market, the Bank applies other valuation techniques that maximize the use of relevant observable inputs and that minimize the use of unobservable inputs. Such valuation techniques include the following: using information available from recent market transactions, referring to the current fair value of a comparable financial instrument, applying discounted cash flow analysis, applying option pricing models, or relying on any other valuation technique that is commonly used by market participants and has proven to yield reliable estimates. Judgment is required when applying many of the valuation techniques. The Bank's valuation was based on its assessment of the conditions prevailing as at July 31, 2020 and may change in the future. Furthermore, there may be valuation uncertainty resulting from the choice of valuation model used.

Fair value is established in accordance with a rigorous control framework. The Bank has policies and procedures that govern the process for determining fair value. The Bank's valuation governance structure has remained largely unchanged from that described in Note 3 to the audited annual consolidated financial statements for the year ended October 31, 2019. The valuation techniques used to determine the fair value of financial assets and liabilities are also described in this note, and no significant changes have been made to the valuation techniques.

## Financial Instruments Recorded at Fair Value on the Consolidated Balance Sheet

### Hierarchy of Fair Value Measurements

IFRS establishes a fair value measurement hierarchy that classifies the inputs used in financial instrument fair value measurement techniques according to three levels. This fair value hierarchy requires observable market inputs to be used whenever such inputs exist. According to the hierarchy, the highest level of inputs are unadjusted quoted prices in active markets for identical instruments and the lowest level of inputs are unobservable inputs. If inputs from different levels of the hierarchy are used, the financial instrument is classified in the same level as the lowest level input that is significant to the fair value measurement. For additional information, see Note 3 to the audited annual consolidated financial statements for the year ended October 31, 2019.

Transfers of financial instruments between Levels 1 and 2 and transfers to (or from) Level 3 are deemed to have taken place at the beginning of the quarter in which the transfer occurred. Significant transfers can occur between the fair value hierarchy levels due to new information about the inputs used to determine fair value and the observable nature of those inputs.

During the quarter ended July 31, 2020, \$3 million in securities classified as at fair value through profit or loss were transferred from Level 2 to Level 1 resulting from changing market conditions (\$9 million in securities classified as at fair value through profit or loss during the quarter ended July 31, 2019). Also during the quarter ended July 31, 2020, \$2 million in securities classified as at fair value through profit or loss were transferred from Level 1 to Level 2 resulting from changing market conditions (\$1 million in securities classified as at fair value through profit or loss during the quarter ended July 31, 2019). During the nine-month periods ended July 31, 2020 and 2019, financial instruments were transferred to (or from) Level 3 due to changes in the availability of observable market inputs resulting from changing market conditions.

The following tables show financial instruments recorded at fair value on the Consolidated Balance Sheet according to the fair value hierarchy.

	As at July 31, 2020			Total financial assets/liabilities at fair value
	Level 1	Level 2	Level 3	
<b>Financial assets</b>				
<b>Securities</b>				
<b>At fair value through profit or loss</b>				
Securities issued or guaranteed by

Other liabilities	–	24	–	24
	8,508	30,793	22	39,323

### Financial Instruments Classified in Level 3

The Bank classifies financial instruments in Level 3 when the valuation technique is based on at least one significant input that is not observable in the markets. The Bank maximizes the use of observable inputs to determine the fair value of financial instruments.

For a description of the valuation techniques and significant unobservable inputs used in determining the fair value of financial instruments classified in Level 3, see Note 3 to the audited annual consolidated financial statements for the year ended October 31, 2019. For the quarter and nine-month period ended July 31, 2020, no significant change was made to the valuation techniques and significant unobservable inputs used in determining fair value.

#### Sensitivity Analysis of Financial Instruments Classified in Level 3

The Bank performs sensitivity analyses on the fair value measurements of financial instruments classified in Level 3, substituting unobservable inputs with one or more reasonably possible alternative assumptions. For additional information on how a change in an unobservable input might affect the fair value measurements of Level 3 financial instruments, see Note 3 to the audited annual consolidated financial statements for the year ended October 31, 2019. For the nine-month period ended July 31, 2020, there were no significant changes in the sensitivity analyses of Level 3 financial instruments.

### Change in the Fair Value of Financial Instruments Classified in Level 3

The Bank may hedge the fair value of financial instruments classified in the various levels through offsetting hedge positions. Gains and losses for financial instruments classified in Level 3 presented in the following tables do not reflect the inverse gains and losses on financial instruments used for economic hedging purposes that may have been classified in Levels 1 or 2 by the Bank. In addition, the Bank may hedge the fair value of financial instruments classified in Level 3 using other financial instruments classified in Level 3. The effect of these hedges is not included in the net amount presented in the following tables. The gains and losses presented hereafter may comprise changes in fair value based on observable and unobservable inputs.

	Nine months ended July 31, 2020				
	Securities at fair value through profit or loss	Securities at fair value through other comprehensive income	Loans	Derivative financial instruments <sup>(1)</sup>	Deposits

Financial instruments transferred into Level 3	–	–	–	(10)	–
Financial instruments transferred out of Level 3	–	–	–	3	11
<b>Fair value as at July 31, 2019</b>	<b>393</b>	<b>363</b>	<b>366</b>	<b>5</b>	<b>–</b>
Change in unrealized gains and losses included in <i>Net income</i> with respect to financial assets and financial liabilities held as at July 31, 2019 <sup>(6)</sup>	(6)	–	18	16	–

(1) The derivative financial instruments include assets and liabilities presented on a net basis.

(2) Total gains (losses) included in *Non-interest income* was a loss of \$35 million.

(3) Total unrealized gains (losses) included in *Non-interest income* was an unrealized loss of \$22 million.

(4) Total gains (losses) included in *Non-interest income* was a gain of \$35 million.

(5) On June 30, 2019, the Bank concluded that it had lost significant influence over NSIA Participations (NSIA), an associate entity in the Ivory Coast, and therefore ceased using the equity method to account for the investment. The Bank designated its investment in NSIA as a financial asset (securities) measured at fair value through other comprehensive income in an amount of \$128 million.

(6) Total unrealized gains (losses) included in *Non-interest income* was an unrealized gain of \$28 million.

## Note 5 – Financial Instruments Designated at Fair Value Through Profit or Loss

The Bank chose to designate certain financial instruments at fair value through profit or loss according to the criteria presented in Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2019. Consistent with its risk management strategy and under the fair value option, which permits the designation if it eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring financial assets and liabilities or recognizing gains and losses thereon on different bases, the Bank designated at fair value through profit or loss certain securities, certain securities purchased under reverse repurchase agreements, and certain liabilities related to transferred receivables. The fair value of liabilities related to transferred receivables does not include credit risk, as the holders of these liabilities are not exposed to the Bank's credit risk. The Bank also designated certain deposits that include embedded derivative financial instruments at fair value through profit or loss.

To determine a change in fair value arising from a change in the credit risk of deposits designated at fair value through profit or loss, the Bank calculates, at the beginning of the period, the present value of the instrument's contractual cash flows using the following rates: first, using an observed discount rate for similar securities that reflects the Bank's credit spread and, then, using a rate that excludes the Bank's credit spread. The difference obtained between the two values is then compared to the difference obtained using the same rates at the end of the period.

Information about the financial assets and financial liabilities designated at fair value through profit or loss is provided in the following tables.

	Carrying value as at July 31, 2020	Unrealized gains (losses) for the quarter ended July 31, 2020	Unrealized gains (losses) for the nine months ended July 31, 2020	Unrealized gains (losses) since the initial recognition of the instrument
<b>Financial assets designated at fair value through profit or loss</b>				
Securities	3,142	6	81	106
<b>Financial liabilities designated at fair value through profit or loss</b>				
Deposits <sup>(1)(2)</sup>	11,040	(444)	573	528
Liabilities related to transferred receivables	7,734	(9)	(175)	(248)
	18,774	(453)	398	280

	Carrying value as at July 31, 2019	Unrealized gains (losses) for the quarter ended July 31, 2019	Unrealized gains (losses) for the nine months ended July 31, 2019	Unrealized gains (losses) since the initial recognition of the instrument
<b>Financial assets designated at fair value through profit or loss</b>				
Securities	3,242	15	86	20
Securities purchased under reverse repurchase agreements	145	–	–	–
	3,387	15	86	20
<b>Financial liabilities designated at fair value through profit or loss</b>				
Deposits <sup>(1)(2)</sup>	11,161	(29)	(722)	(132)
Liabilities related to transferred receivables	7,388	(14)	(161)	(73)
	18,549	(43)	(883)	(205)

(1) For the quarter ended July 31, 2020, the change in the fair value of deposits designated at fair value through profit or loss attributable to credit risk, and recorded in *Other comprehensive income*, resulted in a loss of \$173 million (\$4 million loss for the quarter ended July 31, 2019). For the nine-month period ended July 31, 2020, the corresponding change in this item resulted in a loss of \$22 million (\$11 million loss for the nine-month period ended July 31, 2019).

(2) The amount at maturity that the Bank will be contractually required to pay to the holders of these deposits varies and will differ from the reporting date fair value.

## Note 6 – Securities

### Credit Quality

As at July 31, 2020 and as at October 31, 2019, securities at fair value through other comprehensive income and securities at amortized cost are classified in Stage 1, with their credit quality falling mainly in the “Excellent” category according to the Bank’s internal risk-rating categories. For additional information on the reconciliation of allowances for credit losses, see Note 7 to these consolidated financial statements.

### Gross Gains (Losses) on Securities at Fair Value Through Other Comprehensive Income

	As at July 31, 2020			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Carrying value <sup>(1)</sup>
Securities issued or guaranteed by				
Canadian government	5,121	114	–	5,235
Canadian provincial and municipal governments	4,447	181	–	4,628
U.S. Treasury, other U.S. agencies and other foreign governments	1,860	22	–	1,882
Other debt securities	1,305	60	–	1,365
Equity securities	626	10	(29)	607
	<b>13,359</b>	<b>387</b>	<b>(29)</b>	<b>13,717</b>

	As at October 31, 2019			
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Carrying value <sup>(1)</sup>
Securities issued or guaranteed by

Other debt securities	364	11	(1)	374
Equity securities	649	2	(29)	622
	<b>10,559</b>	<b>124</b>	<b>(35)</b>	<b>10,648</b>

(1) The allowances for credit losses on securities at fair value through other comprehensive income, representing an amount of \$2 million as at July 31, 2020 (a negligible amount as at October 31, 2019), are reported in *Other comprehensive income*. For additional information, see Note 7 to these consolidated financial statements.

### Equity Securities Designated at Fair Value Through Other Comprehensive Income

The Bank designated certain equity securities, the business objective of which is to generate dividend income, at fair value through other comprehensive income without subsequent reclassification of gains and losses to net income.

During the nine-month period ended July 31, 2020, an amount of \$14 million in dividend income was recognized for these investments (\$13 million for the nine-month period ended July 31, 2019), including an amount of \$2 million in dividend income for investments that were sold during the nine-month period ended July 31, 2020 (negligible amount for investments sold during the nine-month period ended July 31, 2019).

	Nine months ended July 31, 2020			Nine months ended July 31, 2019		
	Equity securities of private companies	Equity securities of public companies	Total	Equity securities of private companies	Equity securities of public companies	Total
Fair value at beginning	362	260	622	233	118	351
Change in fair value	9	(15)	(6)	(2)	(15)	(17)
Designated at fair value through other comprehensive income <sup>(1)(2)</sup>	–	81	81	132	179	311
Sales <sup>(3)</sup>	–	(90)	(90)	–	(45)	(45)
<b>Fair value at end</b>	<b>371</b>	<b>236</b>	<b>607</b>	<b>363</b>	<b>237</b>	<b>600</b>

(1) On June 30, 2019, the Bank concluded that it had lost significant influence over NSIA Participations (NSIA), an associate entity in the Ivory Coast, and therefore ceased using the equity method to account for this investment. The Bank had designated its investment in NSIA as a financial asset measured at fair value through other comprehensive income in an amount of \$128 million. Following the fair value measurement, a \$33 million loss was recorded in the *Non-interest income – Other* item of the Consolidated Statement of Income and reported in the *Other* heading of segment results.

(2) On May 9, 2019, after disposing of a portion of its investment in Fiera Capital Corporation, the Bank designated the retained interest as a financial asset measured at fair value through other comprehensive income.

(3) The Bank disposed of public company equity securities for economic reasons.

## Note 6 – Securities (cont.)

### Securities at Amortized Cost

	As at July 31, 2020	As at October 31, 2019
Securities issued or guaranteed by		
Canadian government	6,039	5,248
Canadian provincial and municipal governments	2,443	1,788
U.S. Treasury, other U.S. agencies and other foreign governments	21	139
Other debt securities	2,573	2,581
Gross carrying value	11,076	9,756
Allowances for credit losses	1	1
Carrying value	11,075	9,755

### Gains (Losses) on Disposals of Securities at Amortized Cost

During the nine-month periods ended July 31, 2020 and 2019, the Bank sold certain debt securities measured at amortized cost. The carrying value of these securities upon disposal was \$101 million for the nine-month period ended July 31, 2020 (\$461 million for the nine-month period ended July 31, 2019), and the Bank had recognized gains of \$5 million for the nine-month period ended July 31, 2020 (negligible amount for the nine-month period ended July 31, 2019) in *Non-interest income – Gains (losses) on non-trading securities, net* in the Consolidated Statement of Income.

## Note 7 – Loans and Allowances for Credit Losses

### Determining and Measuring Expected Credit Losses (ECL)

#### Determining Expected Credit Losses

Expected credit losses are determined using a three-stage impairment approach that is based on the change in the credit quality of financial assets since initial recognition.

#### Stage 1

Financial assets that have experienced no significant increase in credit risk between initial recognition and the reporting date and for which 12-month expected credit losses are recorded at the reporting date are classified in Stage 1.

#### Stage 2

Financial assets that have experienced a significant increase in credit risk between initial recognition and the reporting date, and for which lifetime expected credit losses are recorded at the reporting date, are classified in Stage 2.

#### Stage 3

Financial assets for which there is objective evidence of impairment, for which one or more events have had a detrimental impact on the estimated future cash flows of these financial assets at the reporting date, and for which lifetime expected credit losses are recorded, are classified in Stage 3.

#### POCI

Financial assets that are credit-impaired when purchased or originated (POCI) are classified in the POCI category.

For additional information, see Note 7 to the audited annual consolidated financial statements for the year ended October 31, 2019 as well as Note 1 to these consolidated financial statements.

### Credit Quality of Loans

The following tables present the gross carrying amounts of loans as at July 31, 2020 and October 31, 2019, according to credit quality and ECL impairment stage of each loan category at amortized cost, and according to credit quality for loans at fair value through profit or loss. For additional information on credit quality according to the Advanced Internal Rating-Based (AIRB) categories, see the Internal Default Risk Ratings table on page 69 in the Credit Risk section of the *2019 Annual Report*.

(1) In response to the COVID-19 pandemic, the Bank has approved certain payment deferrals for all types of loans. As at July 31, 2020, the gross carrying value of loans for which deferrals have been approved totalled \$3.7 billion for residential mortgages, \$319 million for personal loans, \$15 million for credit card receivables, and \$4.5 billion for business and government loans. These loans are presented in the stage in which they were positioned immediately prior to application of the payment deferral.

(2) Not subject to expected credit losses.

(3) The allowances for credit losses do not include the amounts related to undrawn commitments reported in the *Other liabilities* item of the Consolidated Balance Sheet.

(4) Includes customers' liability under acceptances.

## Loans Past Due But Not Impaired<sup>(1)</sup>

	As at July 31, 2020 <sup>(2)</sup>				As at October 31, 2019			
	Residential mortgage	Personal	Credit card	Business and government <sup>(3)</sup>	Residential mortgage	Personal	Credit card	Business and government <sup>(3)</sup>
Past due but not impaired								
31 to 60 days	76	59	14	43	92	82	27	31
61 to 90 days	42	24	8	22	34	34	13	21
Over 90 days <sup>(4)</sup>	–	–	31	–	–	–	28	–
	<b>118</b>	<b>83</b>	<b>53</b>	<b>65</b>	<b>126</b>	<b>116</b>	<b>68</b>	<b>52</b>

(1) Loans less than 31 days past due are not presented as they are not considered past due from an administrative standpoint.

(2) In response to the COVID-19 pandemic, the Bank has approved certain payment deferrals for all types of loans. These loans are presented in the loan category in which they were positioned immediately prior to the application of the payment deferral.

(3) Includes customers' liability under acceptances.

(4) All loans more than 90 days past due, except for credit card receivables, are considered impaired (Stage 3).

## Impaired Loans

	As at July 31, 2020			As at October 31, 2019		
	Gross	Allowances for credit losses	Net	Gross	Allowances for credit losses	Net
<b>Loans – Stage 3</b>						
Residential mortgage	209	35	174	144	25	119
Personal	141	73	68	162	69	93
Credit card <sup>(1)</sup>	–	–	–	–	–	–
Business and government <sup>(2)</sup>	444	233	211	378	140	238
	<b>794</b>	<b>341</b>	<b>453</b>	<b>684</b>	<b>234</b>	<b>450</b>
<b>POCI loans</b>	<b>949</b>	<b>(73)</b>	<b>1,022</b>	<b>1,166</b>	<b>(57)</b>	<b>1,223</b>
	<b>1,743</b>	<b>268</b>	<b>1,475</b>	<b>1,850</b>	<b>177</b>	<b>1,673</b>

(1) Credit card receivables are considered impaired, at the latest, when payment is 180 days past due, and they are written off at that time.

(2) Includes customers' liability under acceptances.

## Note 7 – Loans and Allowances for Credit Losses (cont.)

### Allowances for Credit Losses

The following tables present a reconciliation of the allowances for credit losses by Consolidated Balance Sheet item and by type of off-balance-sheet commitment.

	Quarter ended July 31, 2020					Allowances for credit losses as at July 31, 2020
	Allowances for credit losses as at April 30, 2020	Provisions for credit losses	Write-offs <sup>(1)</sup>	Disposals	Recoveries and other

(1) The contractual amount outstanding on financial assets that were written off during the quarter ended July 31, 2020 and that are still subject to enforcement activity was \$34 million (\$39 million for the quarter ended July 31, 2019).

(2) These financial assets are presented net of the allowances for credit losses on the Consolidated Balance Sheet.

(3) As at July 31, 2020 and 2019, these financial assets were mainly classified in Stage 1 and their credit quality fell mostly within the *Excellent* category.

(4) The allowances for credit losses are reported in the *Accumulated other comprehensive income* item of the Consolidated Balance Sheet.

(5) The allowances for credit losses are reported in the *Allowances for credit losses* item of the Consolidated Balance Sheet.

(6) The allowances for credit losses are reported in the *Other liabilities* item of the Consolidated Balance Sheet.

- (1) The total amount of undiscounted initially expected credit losses on the POCI loans acquired during the quarter ended July 31, 2020 was nil since no acquisitions were made (\$37 million for the quarter ended July 31, 2019). The expected credit losses reflected in the purchase price were discounted.
- (2) Represent stage transfers deemed to have taken place at the beginning of the quarter in which the transfer occurred.
- (3) Includes the net remeasurement of loss allowances (after transfers) attributable mainly to changes in volumes and in the credit quality of existing loans as well as to changes in risk parameters.
- (4) Represent reversals to loss allowances arising from full loan repayments (excluding write-offs and disposals).
- (5) The allowances for credit losses on undrawn commitments are reported in the *Other liabilities* item of the Consolidated Balance Sheet.

(1) The total amount of undiscounted initially expected credit losses on the POCI loans acquired during the nine months ended July 31, 2020 was \$46 million (\$66 million for the nine months ended July 31, 2019). The expected credit losses reflected in the purchase price were discounted.

(2) Represent stage transfers deemed to have taken place at the beginning of the quarter in which the transfer occurred.

(3) Includes the net remeasurement of loss allowances (after transfers) attributable mainly to changes in volumes and in the credit quality of existing loans as well as to changes in risk parameters.

(4) Represent reversals to loss allowances arising from full loan repayments (excluding write-offs and disposals).

(5) The allowances for credit losses on undrawn commitments are reported in the *Other liabilities* item of the Consolidated Balance Sheet.

(6) Includes customers' liability under acceptances.

(7) Excludes allowances for credit losses on other financial assets at amortized cost and on off-balance-sheet commitments other than undrawn commitments.

## Note 7 – Loans and Allowances for Credit Losses (cont.)

### Main Macroeconomic Factors

The following tables show the main macroeconomic factors used to estimate the allowances for credit losses on loans. For each scenario, namely, the base scenario, upside scenario and downside scenario, the average values of the factors over the next 12 months (used for Stage 1 credit loss calculations) and over the remaining forecast period (used for Stage 2 credit loss calculations) are presented.

	As at July 31, 2020					
	Base scenario		Upside scenario		Downside scenario	
	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period
<b>Macroeconomic factors<sup>(1)</sup></b>						
GDP growth <sup>(2)</sup>	12.9 %	2.7 %	15.1 %	2.8 %	8.2 %	2.8 %
Unemployment rate	9.2 %	8.1 %	8.2 %	7.1 %	11.0 %	8.8 %
Housing price index growth <sup>(2)</sup>	(6.9) %	2.2 %	(2.6) %	2.9 %	(10.9) %	1.1 %
BBB spread <sup>(3)</sup>	2.2 %	2.0 %	2.0 %	1.8 %	2.6 %	2.2 %
S&P/TSX growth <sup>(2)(4)</sup>	6.7 %	3.4 %	12.7 %	3.4 %	(0.1) %	3.6 %
WTI oil price <sup>(5)</sup> (US\$ per barrel)	41	54	50	64	29	43

	As at April 30, 2020					
	Base scenario		Upside scenario		Downside scenario	
	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period
<b>Macroeconomic factors<sup>(1)</sup></b>						
GDP growth <sup>(2)</sup>	1.4 %	2.2 %	6.3 %	2.5 %	(1.7) %	2.0 %
Unemployment rate	8.5 %	7.0 %	7.5 %	5.9 %	9.3 %	8.0 %
Housing price index growth <sup>(2)</sup>	(9.2) %	3.0 %	(4.4) %	3.8 %	(10.9) %	1.0 %
BBB spread <sup>(3)</sup>	2.9 %	2.1 %	2.4 %	1.7 %	3.3 %	2.4 %
S&P/TSX growth <sup>(2)(4)</sup>	(5.6) %	4.1 %	2.1 %	3.1 %	(14.2) %	4.4 %
WTI oil price <sup>(5)</sup> (US\$ per barrel)	27	53	34	64	19	33

	As at October 31, 2019					
	Base scenario		Upside scenario		Downside scenario	
	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period	Next 12 months	Remaining forecast period
<b>Macroeconomic factors<sup>(1)</sup></b>						
GDP growth <sup>(2)</sup>	1.5 %	1.6 %	2.0 %	2.1 %	(2.0) %	1.6 %
Unemployment rate	5.8 %	5.7 %	5.6 %	5.3 %	6.8 %	7.5 %
Housing price index growth <sup>(2)</sup>	3.1 %	3.1 %	6.1 %	2.3 %	(10.9) %	(0.3) %
BBB spread <sup>(3)</sup>	1.6 %	1.6 %	1.5 %	1.4 %	2.7 %	2.6 %
S&P/TSX growth <sup>(2)(4)</sup>	4.9 %	2.4 %	8.5 %	2.9 %	(14.1) %	6.6 %
WTI oil price <sup>(5)</sup> (US\$ per barrel)	61	60	71	69	39	39

(1) All macroeconomic factors are based on the Canadian economy unless otherwise indicated.

(2) Growth rate is annualized.

(3) Yield on corporate BBB bonds less yield on Canadian federal government bonds with 10-year maturity.

(4) Main stock index in Canada.

(5) The West Texas Intermediate (WTI) index is commonly used as a benchmark for the price of oil.

The main macroeconomic factors used for the personal credit portfolio are unemployment rate and growth in the housing price index, based on the economy of Canada or Quebec. The main macroeconomic factors used for the business and government credit portfolio are unemployment rate, spread on corporate BBB bonds, S&P/TSX growth, and WTI oil price.

An increase in unemployment rate or spread on corporate BBB bonds will generally correlate with higher allowances for credit losses, whereas an increase in the other macroeconomic factors (GDP, S&P/TSX, housing price index and WTI oil price) will generally correlate with lower allowances for credit losses.

During the quarter ended July 31, 2020, certain macroeconomic factors improved and others continued to worsen following a gradual lifting of the lockdown, whereas during the quarter ended April 30, 2020, the main macroeconomic factors had deteriorated significantly given the closing of non-essential services.

According to the base scenario, the Canadian economy will rebound in the second half of the year as lockdown measures are lifted, but the year-end unemployment rate will remain above pre-recession levels. Oil will remain close to US\$40 at year's end and rise in 2021. Given a difficult labour market and reduced immigration, housing prices will decline, and the S&P/TSX will be at 15,300 points at year-end 2020 and at 16,200 points at the end of 2021.

According to the upside scenario, the economy will rebound more strongly thanks to medical breakthroughs that help fight COVID-19. Fiscal and monetary stimulus measures will limit the damage arising from destroyed production capacity. The unemployment rate at year-end 2020 will be more favourable than the base scenario (1 percentage point lower). Housing prices will decline slightly, the S&P/TSX will end the current year at 16,000 points, and the price of oil will bounce back at year-end 2020.

According to the downside scenario, a second wave of COVID-19 will require governments to impose another lockdown in the fourth quarter of 2020, inflicting a new round of stress on the financial markets. The result will be greater destruction of production capacity. The unemployment rate will therefore trend upward at the end of 2020. Housing prices will decrease considerably, the price of oil will decrease at the end of 2020, and the S&P/TSX will be at 14,400 points at the end of the current year.

Given uncertainty surrounding the key inputs used to measure credit losses, the Bank has applied expert credit judgment to adjust the modelled ECL results.

## Sensitivity Analysis of Allowances for Credit Losses on Non-Impaired Loans

### Scenarios

The following table shows a comparison of the Bank's allowances for credit losses on non-impaired loans (Stages 1 and 2) as at July 31, 2020 based on the probability weightings of three scenarios with allowances for credit losses resulting from simulations of each scenario weighted at 100%.

	<b>Allowances for credit losses on non-impaired loans</b>
<b>Balance as at July 31, 2020</b>	<b>999</b>
<b>Simulations</b>	
100% upside scenario	<b>817</b>
100% base scenario	<b>958</b>
100% downside scenario	<b>1,309</b>

## Note 8 – Financial Assets Transferred But Not Derecognized

In the normal course of its business, the Bank enters into transactions in which it transfers financial assets such as securities or loans directly to third parties, in particular structured entities. According to the terms of some of those transactions, the Bank retains substantially all of the risks and rewards related to those financial assets. The risks include credit risk, interest rate risk, foreign exchange risk, prepayment risk and other price risks, whereas the rewards include income streams associated with the financial assets. As such, those financial assets are not derecognized and the transactions are treated as collateralized or secured borrowings. For additional information on the nature of those transactions, see Note 8 to the audited annual consolidated financial statements for the year ended October 31, 2019.

The following table provides additional information about the nature of the transferred financial assets that do not qualify for derecognition and the associated liabilities.

	As at July 31, 2020	As at October 31, 2019
<b>Carrying value of financial assets transferred but not derecognized</b>		
Securities <sup>(1)</sup>	61,637	47,297
Residential mortgages	20,022	20,142
	<b>81,659</b>	<b>67,439</b>
<b>Carrying value of associated liabilities<sup>(2)</sup></b>	<b>45,245</b>	<b>36,625</b>
<b>Fair value of financial assets transferred but not derecognized</b>		
Securities <sup>(1)</sup>	61,637	47,297
Residential mortgages	20,510	20,308
	<b>82,147</b>	<b>67,605</b>
<b>Fair value of associated liabilities<sup>(2)</sup></b>	<b>45,613</b>	<b>36,714</b>

(1) The amount related to the securities loaned is the maximum amount of Bank securities that can be lent. For obligations related to securities sold under repurchase agreements, the amount includes the Bank's own financial assets as well as those of third parties and excludes bearer deposit notes issued by the Bank and covered bonds issued by the Bank.

(2) Associated liabilities include liabilities related to transferred receivables and obligations related to securities sold under repurchase agreements before the offsetting impact of \$1,068 million as at July 31, 2020 (\$3,166 million as at October 31, 2019) excluding repurchase agreements guaranteed by bearer deposit notes issued by the Bank and covered bonds issued by the Bank. Liabilities related to securities loaned are not included, as the Bank can lend its own financial assets and those of third parties. The carrying value and fair value of liabilities related to securities loaned were \$6,011 million as at July 31, 2020 (\$9,753 million as at October 31, 2019).

The following table specifies the nature of the transactions related to financial assets transferred but not derecognized.

	As at July 31, 2020	As at October 31, 2019
<b>Carrying value of financial assets transferred but not derecognized</b>		
Securities backed by insured residential mortgage loans and other securities sold to Canada Housing Trust	20,618	21,035
Securities sold under repurchase agreements	25,527	16,294
Securities loaned	35,514	30,110
	<b>81,659</b>	<b>67,439</b>

## Note 9 – Other Assets

	As at July 31, 2020	As at October 31, 2019
Receivables, prepaid expenses and other items	994	696
Interest and dividends receivable	540	623
Due from clients, dealers and brokers	783	570
Defined benefit asset	30	38
Deferred tax assets	594	562
Current tax assets	402	216
Reinsurance assets	30	33
	<b>3,373</b>	<b>2,738</b>

## Note 10 – Deposits

	As at July 31, 2020			As at October 31, 2019
	On demand <sup>(1)</sup>	After notice <sup>(2)</sup>	Fixed term <sup>(3)</sup>	Total
Personal	5,340	32,531	28,289	66,160
Business and government	49,762	22,981	61,971	134,714
Deposit-taking institutions	2,257	941	1,406	4,604
	<b>57,359</b>	<b>56,453</b>	<b>91,666</b>	<b>205,478</b>
				189,566

(1) Demand deposits are deposits for which the Bank does not have the right to require notice of withdrawal and consist essentially of deposits in chequing accounts.

(2) Notice deposits are deposits for which the Bank may legally require notice of withdrawal and consist mainly of deposits in savings accounts.

(3) Fixed-term deposits are deposits that can be withdrawn by the holder on a specified date and include term deposits, guaranteed investment certificates, savings accounts and plans, covered bonds and similar instruments.

The *Deposits – Business and government* item includes, among other items, covered bonds, the balance of which was \$10.3 billion as at July 31, 2020 (\$9.5 billion as at October 31, 2019). During the nine months ended July 31, 2020, the Bank issued covered bonds for an amount of US\$200 million (an amount of 1.0 billion euros of covered bonds issued under the legislative covered bond program came to maturity, and the Bank issued covered bonds in amounts of US\$1.3 billion and 750 million euros during the nine-month period ended July 31, 2019). For additional information on covered bonds, see Note 27 to the audited annual consolidated financial statements for the year ended October 31, 2019.

Also as at July 31, 2020, the *Deposits – Business and government* item also includes deposits of \$8.0 billion (\$3.5 billion as at October 31, 2019) that are subject to the bank bail-in conversion regulations issued by the Government of Canada. These regulations provide certain powers to the Canada Deposit Insurance Corporation (CDIC), notably the power to convert certain eligible Bank shares and liabilities into common shares should the Bank become non-viable.

## Note 11 – Other Liabilities

	As at July 31, 2020	As at October 31, 2019
Accounts payable and accrued expenses	1,852	1,883
Subsidiaries' debts to third parties	400	1,225
Interest and dividends payable	562	1,061
Lease liabilities <sup>(1)</sup>	638	–
Due to clients, dealers and brokers	894	548
Defined benefit liability	205	374
Allowances for credit losses — off-balance-sheet commitments (Note 7)	184	74
Deferred tax liabilities	1	5
Current tax liabilities	35	144
Insurance liabilities	–	24
Other items <sup>(2)(3)(4)</sup>	896	839
	<b>5,667</b>	<b>6,177</b>

(1) As at November 1, 2019, upon IFRS 16 adoption, the Bank recognized lease liabilities totalling \$668 million.

(2) As at July 31, 2020, other items included a \$2 million restructuring provision (\$6 million as at October 31, 2019).

(3) As at July 31, 2020, other items included a \$6 million litigation provision (\$19 million as at October 31, 2019).

(4) As at November 1, 2019, upon IFRS 16 adoption, provisions for onerous contracts totalling \$20 million were applied against the right-of-use assets reported in the *Premises and equipment* item.

## Note 12 – Share Capital

### Repurchase of Common Shares

During the nine-month period ended July 31, 2020, the Bank repurchased 525,000 common shares for \$30 million, which reduced *Common share* capital by \$5 million and *Retained earnings* by \$25 million. During the nine-month period ended July 31, 2019, the Bank had repurchased 3,547,200 common shares for \$215 million, which had reduced *Common share* capital by \$31 million and *Retained earnings* by \$184 million. These repurchases were carried out before March 13, 2020, which was the date on which OSFI lowered the domestic stability buffer and indicated that it was expecting all banks to cease any dividend increases or share buybacks.

### Shares Outstanding

	As at July 31, 2020		As at October 31, 2019	
	Number of shares	Shares \$	Number of shares	Shares \$
<b>First Preferred Shares</b>				
Series 30	14,000,000	350	14,000,000	350
Series 32	12,000,000	300	12,000,000	300
Series 34	16,000,000	400	16,000,000	400
Series 36	16,000,000	400	16,000,000	400
Series 38	16,000,000	400	16,000,000	400
Series 40	12,000,000	300	12,000,000	300
Series 42	12,000,000	300	12,000,000	300
	<b>98,000,000</b>	<b>2,450</b>	<b>98,000,000</b>	<b>2,450</b>
Common shares at beginning of the fiscal year	334,172,411	2,949	335,070,642	2,822
Issued pursuant to the Stock Option Plan	2,009,141	96	2,950,922	122
Repurchases of common shares for cancellation	(525,000)	(5)	(4,547,200)	(40)
Impact of shares purchased or sold for trading <sup>(1)</sup>	9,443	–	699,564	45
Other	–	–	(1,517)	–
<b>Common shares at end of the period</b>	<b>335,665,995</b>	<b>3,040</b>	<b>334,172,411</b>	<b>2,949</b>

(1) As at July 31, 2020, a total of 5,597 shares were sold short for trading, representing a negligible amount (3,846 shares held for trading representing a negligible amount as at October 31, 2019).

### Dividends Declared

	Nine months ended July 31			
	2020		2019	
	Dividends \$	Dividends per share	Dividends \$	Dividends per share
<b>First Preferred Shares</b>

Series 42	11	0.9281	11	0.9281
	<b>87</b>		<b>87</b>	
Common shares	715	2.1300	664	1.9800
	<b>802</b>		<b>751</b>	

### Common Shares Held in Escrow

As part of the acquisition of Wellington West Holdings Inc. in 2011, the Bank had issued common shares held in escrow. As at July 31, 2020, the number of common shares held in escrow was 21,510 (21,510 as at October 31, 2019). The Bank expects that the remaining shares in escrow will be settled by the end of calendar year 2020.

## Note 13 – Non-Controlling Interests

	As at July 31, 2020	As at October 31, 2019
Trust units issued by NBC Asset Trust (NBC CapS II) – Series 2 <sup>(1)</sup>	–	359
Other	(9)	(1)
	(9)	358

(1) Includes \$9 million in accrued interest as at October 31, 2019.

### Redemption of Trust Units Issued by NBC Asset Trust

On June 30, 2020, NBC Asset Trust (the Trust), a closed-end trust established by the Bank, redeemed all of the outstanding 350,000 Trust units – Series 2 (NBC CapS II – Series 2) at a per-unit price of \$1,000 for gross proceeds of \$350 million. The redemption was approved by OSFI. For additional information about the Trust, see Notes 19 and 27 to the audited annual consolidated financial statements for the year ended October 31, 2019. On July 17, 2020, the Trust was dissolved.

## Note 14 – Capital Disclosure

During the second quarter of 2020, OSFI adjusted regulatory ratio requirements in response to the impact of the COVID-19 pandemic. For additional information, see the section entitled “COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities” on pages 7 to 9 of this MD&A. The Bank and all other major Canadian banks have to maintain minimum capital ratios established by OSFI: a CET1 capital ratio of at least 9.0%, a Tier 1 capital ratio of at least 10.5%, and a Total capital ratio of at least 12.5%. All of these ratios are to include a capital conservation buffer of 2.5%, a 1.0% surcharge applicable solely to Domestic Systemically Important Banks (D-SIBs), and a 1.0% domestic stability buffer. The domestic stability buffer, which can vary from 0% to 2.5% of risk-weighted assets, consists exclusively of CET1 capital. A D-SIB that fails to meet this buffer requirement will not be subject to automatic constraints to reduce capital distributions but will have to provide a remediation plan to OSFI. On March 13, 2020, OSFI lowered the buffer to 1.0%, effective immediately. On June 23, 2020, OSFI confirmed that the buffer will be maintained at 1.0% until December 2020. The banks also have to meet the capital floor that sets the regulatory capital level according to the Basel II standardized approach. If the capital requirement under Basel III is less than 70% of the capital requirements as calculated under Basel II, the difference is added to risk-weighted assets. OSFI requires Canadian banks to meet a Basel III leverage ratio of at least 3.0%.

During the quarter and the nine-month period ended July 31, 2020, the Bank was in compliance with all of OSFI’s regulatory capital requirements.

## Regulatory Capital and Ratios Under Basel III

	As at July 31, 2020 Adjusted <sup>(1)</sup>	As at July 31, 2020	As at October 31, 2019
<b>Capital</b>			
CET1	10,608	10,840	9,692
Tier 1	13,058	13,290	12,492
Total	14,336	14,336	13,366
<b>Risk-weighted assets</b>	94,814	94,814	83,039
<b>Total exposure</b>	309,001	309,001	308,902
<b>Capital ratios</b>			
CET1	11.2 %	11.4 %	11.7 %
Tier 1	13.8 %	14.0 %	15.0 %
Total	15.1 %	15.1 %	16.1 %
<b>Leverage ratio</b>	4.2 %	4.3 %	4.0 %

(1) The Basel III regulatory capital and ratios adjusted as at July 31, 2020 do not include the transitional measure applicable to expected credit loss provisioning. For additional information, see the section entitled COVID-19 Pandemic – Key Measures Introduced by the Regulatory Authorities on pages 7 to 9 of this MD&A.

## Note 15 – Share-Based Payments

### Stock Option Plan

During the quarters ended July 31, 2020 and 2019, the Bank did not award any stock options. During the nine months ended July 31, 2020, the Bank awarded 1,789,280 stock options (2,116,892 stock options during the nine months ended July 31, 2019) with an average fair value of \$5.11 per option (\$6.14 in 2019).

As at July 31, 2020, there were 11,779,220 stock options outstanding (12,103,626 stock options as at October 31, 2019).

The average fair value of the options awarded was estimated on the award date using the Black-Scholes model as well as the following assumptions.

	Nine months ended July 31	
	2020	2019
Risk-free interest rate	<b>1.94%</b>	2.50%
Expected life of options	<b>7 years</b>	7 years
Expected volatility	<b>14.97%</b>	18.40%
Expected dividend yield	<b>4.29%</b>	4.37%

During the quarter ended July 31, 2020, a \$2 million compensation expense was recorded for this plan (\$3 million for the quarter ended July 31, 2019). During the nine months ended July 31, 2020, a \$7 million compensation expense was recorded for this plan (\$9 million for the nine months ended July 31, 2019).

## Note 16 – Employee Benefits – Pension Plans and Other Post-Employment Benefits

The Bank offers defined benefit pension plans and other post-employment benefit plans to eligible employees. The cost associated with these plans, including the remeasurements recognized in *Other comprehensive income*, is presented in the following table.

### Cost for Pension Plans and Other Post-Employment Benefit Plans

	Quarter ended July 31			
	Pension plans		Other post-employment benefit plans	
	2020	2019	2020	2019
Current service cost	32	24	–	1

(1) Changes related to the discount rate and to the return on plan assets are reviewed and updated on a quarterly basis. All other assumptions are updated annually.

(2) Excludes interest income.

## Note 17 – Income Taxes

In April 2020, the Bank was reassessed by the Canada Revenue Agency (CRA) for additional income tax and interest of approximately \$240 million (including estimated provincial tax and interest) in respect of certain Canadian dividends received by the Bank during 2015.

In prior fiscal years, the Bank was reassessed for additional income tax and interest of approximately \$370 million (including provincial tax and interest) in respect of certain Canadian dividends received by the Bank during the 2014, 2013 and 2012 taxation years.

The transactions to which the above-mentioned reassessments relate are similar to those prospectively addressed by income tax legislation enacted as a result of the 2015 and 2018 Canadian federal budgets.

The CRA may issue reassessments to the Bank for taxation years subsequent to 2015 in regard to activities similar to those that were the subject of the above-mentioned reassessments. The Bank remains confident that its tax position was appropriate and intends to vigorously defend its position. As a result, no amount has been recognized in the consolidated financial statements as at July 31, 2020.

## Note 18 – Earnings Per Share

Diluted earnings per share is calculated by dividing net income attributable to common shareholders by the weighted average number of common shares outstanding after taking into account the dilution effect of stock options using the treasury stock method and any gain (loss) on the redemption of preferred shares.

	Quarter ended July 31		Nine months ended July 31	
	2020	2019	2020	2019
<b>Basic earnings per share</b>				
Net income attributable to the Bank's shareholders	589	591	1,551	1,666
Dividends on preferred shares	29	29	87	87
Net income attributable to common shareholders	560	562	1,464	1,579
Weighted average basic number of common shares outstanding ( <i>thousands</i> )	335,552	334,843	335,390	335,344
<b>Basic earnings per share (<i>dollars</i>)</b>	<b>1.67</b>	1.68	<b>4.37</b>	4.71
<b>Diluted earnings per share</b>				
Net income attributable to common shareholders	560	562	1,464	1,579
Weighted average basic number of common shares outstanding ( <i>thousands</i> )	335,552	334,843	335,390	335,344
Adjustment to average number of common shares ( <i>thousands</i> )				
Stock options <sup>(1)</sup>	1,679	2,925	2,074	2,778
Weighted average diluted number of common shares outstanding ( <i>thousands</i> )	337,231	337,768	337,464	338,122
<b>Diluted earnings per share (<i>dollars</i>)</b>	<b>1.66</b>	1.66	<b>4.34</b>	4.67

- (1) For the quarter ended July 31, 2020, the calculation of diluted earnings per share excluded an average number of 3,381,741 options outstanding with a weighted average exercise price of \$68.17 (1,766,024 options outstanding with a weighted average exercise price of \$64.14 for the quarter ended July 31, 2019), as the exercise price of these options was greater than the average price of the Bank's common shares. For the nine months ended July 31, 2020, the calculation of diluted earnings per share excluded an average number of 3,162,455 options outstanding with a weighted average exercise price of \$68.17 (1,783,167 options outstanding with a weighted average exercise price of \$64.14 for the nine months ended July 31, 2019).

## Note 19 – Contingent Liabilities

### Maple Financial Group Inc.

The Bank has a 24.9% equity interest in Maple Financial Group Inc. (Maple), a privately owned Canadian company that operated through direct and indirect wholly owned subsidiaries in Canada, Germany, the United Kingdom and the United States.

Maple Bank GmbH (Maple GmbH), an indirect wholly owned subsidiary of Maple, has been the subject of an investigation into alleged tax irregularities by German prosecutors since September 2015, and the investigation was focusing on selected trading activities by Maple GmbH and some of its former employees, primarily during taxation years 2006 to 2010. The German authorities have alleged that these trading activities, often referred to as “cum/ex trading,” violated German tax laws. Neither the Bank nor its employees were involved in these trading activities and, to the Bank’s knowledge, are not the subject of this investigation. At that time, the Bank announced that if it were determined that portions of the dividends it received from Maple could be reasonably attributed to tax fraud by Maple GmbH, arrangements would be made to repay those amounts to the relevant authority.

On February 6, 2016, the German Federal Financial Supervisory Authority, BaFin, placed a moratorium on the business activities of Maple GmbH preventing it from carrying out its normal business activities. In August 2016, Maple filed for bankruptcy under applicable Canadian laws, and a trustee was appointed to administer the company. Similar proceedings were initiated for each of Maple’s other material subsidiaries in their home jurisdictions. In light of the situation, the Bank wrote off the carrying value of its equity interest in Maple in an amount of \$164 million (\$145 million net of income taxes) during the first quarter of 2016. The \$164 million write-off of the equity interest in this associate was recognized in the *Non-interest income – Other* item of the Consolidated Statement of Income for the year ended October 31, 2016 and was reported in the Financial Markets segment.

While there has not yet been a determination of tax fraud on the part of Maple GmbH or its employees, in the insolvency proceedings of Maple GmbH the German finance office issued a declaration about the result of the tax audit at Maple GmbH and about the relevant tax consequences of the cum/ex trading and concluded a final tax claim of the tax authorities against the insolvency administrator. This claim was approved by the Maple GmbH creditor assembly.

The Bank has been in contact with the German prosecutors, who have confirmed that, in their view based upon the evidence they have considered since the occurrence of the insolvency, the Bank was not involved in any respect with the alleged tax fraud undertaken by Maple GmbH nor was it negligent in failing to identify that alleged fraud. Further to discussions between the Bank and the German prosecutors concerning the amounts deemed attributable to the alleged tax fraud, the Bank paid 7.7 million euros to the German tax authorities on November 19, 2019. As at October 31, 2019, an \$11 million provision was recorded to reflect this adjusting event after the Consolidated Balance Sheet date.

In December 2019, the Bank, together with the other principal Maple shareholders, reached an agreement with the bankruptcy and insolvency administrator of Maple GmbH to settle any potential claims that might be asserted against them by or on behalf of Maple GmbH. In connection with the settlement, the Bank agreed to pay 8.7 million euros for the benefit of Maple GmbH’s creditors and, during the first quarter of 2020, recorded a \$13 million charge in the *Non-interest expenses – Other* item presented in the *Other* heading of segment results. During the third quarter of 2020, by virtue of the finalization of this agreement, all material liabilities associated with the Bank’s ownership of Maple have been resolved.

## Note 20 – Segment Disclosures

The Bank carries out its activities in four business segments, which are defined below. For presentation purposes, other activities are grouped in the *Other* heading. Each reportable segment is distinguished by services offered, type of clientele, and marketing strategy.

### **Personal and Commercial**

The Personal and Commercial segment encompasses the banking, financing, and investing services offered to individuals, advisors and businesses as well as insurance operations.

### **Wealth Management**

The Wealth Management segment comprises investment solutions, trust services, banking services, lending services and other wealth management solutions offered through internal and third-party distribution networks.

### **Financial Markets**

The Financial Markets segment encompasses corporate banking and investment banking and financial solutions for large and mid-size corporations, public sector organizations, and institutional investors. The segment is also active in proprietary trading and investment activities for the Bank.

### **U.S. Specialty Finance and International (USSF&I)**

The USSF&I segment encompasses the specialty finance expertise provided by the Credigy subsidiary; the activities of the ABA Bank subsidiary, which offers financial products and services to individuals and businesses in Cambodia; and the activities of targeted investments in certain emerging markets.

### **Other**

This heading encompasses treasury activities, liquidity management, Bank funding, asset/liability management activities, certain non-recurring items, and the unallocated portion of corporate units.

(1) For the quarter and nine-month period ended July 31, 2019, certain amounts have been reclassified.

(2) The *Net interest income*, *Non-interest income* and *Income taxes (recovery)* items of the business segments are presented on a taxable equivalent basis. Taxable equivalent basis is a calculation method that consists of grossing up certain tax-exempt income by the amount of income tax that would have been otherwise payable. For the business segments as a whole, *Net interest income* was grossed up by \$49 million (\$58 million in 2019), *Non-interest income* was grossed up by \$4 million (\$36 million in 2019), and an equivalent amount was recognized in *Income taxes (recovery)*. The effect of these adjustments has been reversed under the *Other* heading.

(3) During the quarter and nine-month period ended July 31, 2019, for the *Other* heading of segment results, the *Non-interest income* item had included a \$79 million gain on disposal of Fiera Capital Corporation shares, a \$50 million gain on disposal of premises and equipment, and a \$33 million loss resulting from the fair value measurement of an economic interest.

(4) During the quarter and nine-month period ended July 31, 2019, for the *Other* heading of segment results, the *Non-interest expenses* item had included \$57 million in impairment losses on premises and equipment and on intangible assets, \$45 million in onerous contract provisions, and \$10 million in severance pay.

(5) For the nine-month period ended July 31, 2020, *Net interest income* was grossed up by \$162 million (\$138 million in 2019), *Non-interest income* was grossed up by \$54 million (\$99 million in 2019), and an equivalent amount was recognized in *Income taxes (recovery)*. The effect of these adjustments has been reversed under the *Other* heading.

(6) During the nine months ended July 31, 2020, for the *Other* heading of segment results, the *Non-interest expenses* item included a \$13 million charge related to Maple.

(subject to approval by the Board of Directors of the Bank)

First quarter	February 27
Second quarter	May 26
Third quarter	August 26
Fourth quarter	December 2

## Disclosure of Third Quarter 2020 Results

### Conference Call

- A conference call for analysts and institutional investors will be held on Wednesday, August 26, 2020 at 1:00 p.m. EDT.
- Access by telephone in listen-only mode: 1-800-806-5484 or 416-340-2217. The access code is 8516795#.
- A recording of the conference call can be heard until September 26, 2020 by dialing 1-800-408-3053 or 905-694-9451. The access code is 1511461#.

### Webcast

- The conference call will be webcast live at [nbc.ca/investorrelations](http://nbc.ca/investorrelations).
- A recording of the webcast will also be available on National Bank's website after the call.

### Financial Documents

- The *Report to Shareholders* (which includes the quarterly consolidated financial statements) is available at all times on National Bank's website at [nbc.ca/investorrelations](http://nbc.ca/investorrelations).
- The *Report to Shareholders*, the *Supplementary Financial Information*, the *Supplementary Regulatory Capital and Pillar 3 Disclosure*, and a slide presentation will be available on the Investor Relations page of National Bank's website on the morning of the day of the conference call.

## Transfer Agent and Registrar

For information about stock transfers, address changes, dividends, lost certificates, tax forms, and estate transfers, shareholders of record may contact the transfer agent, Computershare Trust Company of Canada, at the address or telephone number below.

## Computershare Trust Company of Canada

Share Ownership Management  
100 University Avenue, 8<sup>th</sup> Floor  
Toronto, Ontario M5J 2Y1  
Telephone: 1-888-838-1407  
Fax: 1-888-453-0330  
Email: [service@computershare.com](mailto:service@computershare.com)  
Website: [computershare.com](http://computershare.com)

Shareholders whose shares are held by a market intermediary are asked to contact the market intermediary concerned.

## Direct Deposit Service for Dividends

Shareholders may elect to have their dividend payments deposited directly via electronic funds transfer to their bank account at any financial institution that is a member of the Canadian Payments Association. To do so, they must send a written request to the transfer agent, Computershare Trust Company of Canada.

## Dividend Reinvestment and Share Purchase Plan

National Bank has a Dividend Reinvestment and Share Purchase Plan for Canadian holders of its common and preferred shares under which they can acquire common shares of the Bank without paying commissions or administration fees. Canadian participants acquire common shares through the reinvestment of cash dividends paid on the shares they hold or through optional cash payments of at least \$1 per payment, up to a maximum of \$5,000 per quarter.

For additional information, shareholders may contact National Bank's registrar and transfer agent, Computershare Trust Company of Canada, at 1-888-838-1407. To participate in the plan, National Bank's beneficial or non-registered common shareholders must contact their financial institution or broker.

## Dividends

Dividends paid are "eligible dividends" in accordance with the *Income Tax Act* (Canada).
