Notes to users

- 1) The quantitative information in this document has been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), unless otherwise indicated, and should be read in conjunction with the Report to Shareholders for all quarters of 2022. This supplementary financial information (SFI) is unaudited and should be read in conjunction with the 2022 Annual Report (including audited consolidated financial statements and accompanying management's discussion and analysis). Additional financial information is also available through our quarterly investor presentations as well as the quarterly conference call webcast. All amounts are in millions of Canadians dollars, unless otherwise indicated.
- 2) Information related to regulatory capital as well as Pillar 3 and risk disclosures required by the Enhanced Disclosure Task Force (EDTF) is provided in the document entitled Supplementary Regulatory Capital and Pillar 3 Disclosure, which is available on the Bank's website at nbc.ca.

3) Non-GAAP Financial Measures and Other Financial Measures

The Bank uses non-GAAP financial measures that do not have standardized meanings under GAAP and that therefore may not be comparable to similar measures used by other companies. Presenting non-GAAP financial measures helps readers to better understand how management analyzes results, shows the impacts of specified items on the results of the reported periods, and allows readers to assess results without the specified items if they consider such items not to be reflective of the underlying performance of the Bank's operations. In addition, like many other financial institutions, the Bank uses the taxable equivalent basis to calculate net interest income, non-interest income, and income taxes. This calculation method consists of grossing up certain tax-exempt income (particularly dividends) by the income tax that would have been otherwise payable. An equivalent amount is added to income taxes. This adjustment is necessary in order to perform a uniform comparison of the return on different assets regardless of their tax treatment. For additional information on non-GAAP financial measures, see pages 12 and 13 in this document and the Financial Reporting Method section on pages 16 to 21 of the Management's Discussion and Analysis (MD&A) in the 2022 Annual Report and on pages 2 to 4 of the Fourth Quarter 2022 Press Release, which are available on the Bank's website at nbc.ca or the SEDAR website at sedar.com.

Other Financial Measures

For additional information on the composition of non-GAAP ratios and supplementary financial measures, as well as on capital management measures, see the Financial Reporting Method and Glossary sections on pages 16 to 21 and 122 to 125, respectively, of the MD&A in the 2022 Annual Report, which is available on the Bank's website at nbc.ca or the SEDAR website at sedar.com.

- 4) For the comparative figures, certain amounts have been revised from those previously reported in order to be consistent with the presentation adopted by the Bank for the year beginning November 1, 2021.
 - The presentation of segment disclosures is consistent with the presentation adopted by the Bank for the fiscal year beginning November 1, 2021. This presentation reflects the fact that the loan portfolio comprising borrowers in the "Oil and gas" and "Pipelines" sectors as well as related activities, which had previously been reported in the Personal and Commercial segment, are now reported in the Financial Markets segment. The Bank made this change to better align the monitoring of its activities with its management structure.
 - A change in accounting policy, as described in the "Accounting Policy Changes" section of Note 1 to the audited annual consolidated financial statements for the year ended October 31, 2022, was applied retrospectively during the year ended October 31, 2022 after the International Financial Reporting Interpretations Committee's (IFRIC) issued a final agenda decision on accounting for the costs of configuring or customizing a supplier's software in a cloud computing arrangement. The figures for the quarters 2021 and 2020 have been adjusted to reflect this change in accounting policy.
